

THE DENVER FIRE DEPARTMENT

PRESENTS

DENVER FIRE ADVANCED EXTRICATION "CHOP SHOP"

This Auto Extrication course provides rescuers with the skills to handle vehicles of today and the future. Our instructors continue to be on the leading edge of extrication techniques bringing real-life rescue experience to the course. Rescuers will learn new methodology to basic principles and advanced alternatives for general application. This two-day, hands on skill building course will focus on tool application to a variety of classic scenarios. The groups will be small to provide ample opportunities for tool time along with close instruction.
