Dear trusted community member,

We would like to take this opportunity to announce the opening of the Trauma & Disaster Recovery Clinic, a clinic dedicated to serving the greater Denver community.

The Trauma & Disaster Recovery Clinic at DU provides help to people after adversity with services that honor and expand their strengths and resources. We offer comprehensive psychological services to those affected by trauma, including accidents, crime, abuse, natural disaster, and refugee status. The TDRC assists those in need of psychological interventions to alleviate the effects of traumatic experiences and foster resilience as well as personal, family, and community growth.

Housed at the Professional Psychology Center (PPC) at the University of Denver, which has provided low-cost, high quality psychological services to the underserved communities of Denver for over 30 years, the TDR Clinic expands that tradition by focusing on trauma treatment and recovery strategies. Our team takes an integrative approach to treatment based upon a comprehensive initial evaluation of the challenges faced by clients, their families, and communities. Approaches are flexibly applied depending upon people's needs, and services are continually evaluated to insure effectiveness.

The TDRC also provides community outreach programs to agencies serving at-risk populations. Outreach services bring psychological care and education to those who are unable to access the PPC. Programs include:

- *Group services*
- *Psychoeducational services*
- *Informational presentations*
