Summary of County Jail Data

Pursuant to House Bill 19-1297

September 2020

Prepared by

Peg Flick

Stan Hilkey, Executive Director, Department of Public Safety
Joe Thome, Director, Division of Criminal Justice
Kim English, Research Director, Office of Research and Statistics

Acknowledgements

The Division of Criminal Justice, Office of Research and Statistics, is extremely grateful to the group of county jail representatives who, at the onset of this project, met with researchers to discuss the data elements required in House Bill 19-1297 and assist in the development of the data collection instrument. Many thanks to the following individuals:

Susan Argo	Adams County
Kimberly Byrd	El Paso County
Jeff Goetz	Boulder County
Maria Gork	City and County of Broomfield
Eric Greene	Arapahoe County
Shawn Laughlin	Broomfield
Armando Saldade	City and County of Denver
Jill Schroeder	Jefferson County
Jeff Smith	Clear Creek County
Todd Spanier	Arapahoe County
Gregory VanWyk	Eagle County

We also thank the county jail officials that provided the data presented in this report.

Executive Summary

Background

House Bill 19-1297 was enacted on May 31, 2019. It requires all county jails in Colorado to report specific data elements to the Division of Criminal Justice (DCJ) on a quarterly basis. Beginning in January 2020, reports are due to DCJ the third Friday of every quarter. DCJ is mandated to make the data available online one month from the report due date.

County jails submit data to DCJ using a template that DCJ developed. Upon submission, DCJ reviews the data and communicates any problems back to the jails so that they may correct and re-submit their data. If a jail has not submitted data 30 days after the due date, the Department of Public Safety is required to notify them that they are not in compliance with the statute.

The data required by H.B.19-1297 are not records of individual jail stays, but rather counts of specific inmate or jail statuses.

The data items are collected for three time periods:

1. The three months prior to the first day of the reporting quarter,
2. On the first day of the reporting quarter (snapshot date), and
3. The 365 days prior to the first day of the reporting quarter; because reports are submitted quarterly, the 365-day periods overlap each other.

For counting purposes counties are required to categorize individuals using a hierarchy that determines the most serious confinement status (sentenced, un-sentenced with a hold, or pretrial) and most serious case level (felony, misdemeanor) for each person. Some of the required measures are further categorized by gender, race, and ethnicity.

This report contains the county jail data aggregated at the state level. Individual county-level data are available on the jail data dashboard on DCJ's website. This dashboard may be found at:

<https://www.colorado.gov/pacific/dcj-ors/ors-jaildata>

Not all counties submitted a report every quarter, and not all counties submitted all required data elements every quarter when they did submit a report. When counties are unable to provide a data element, H.B. 19-1297 requires them to provide an explanation on reasonable efforts made to collect the data. These explanations appear as "Agency Notes" on the dashboard and are included in Appendix B of this report. When the data counties provided deviated from the statutory definition, agencies also noted this in their "Agency Notes".

For fifteen of the required measures there is a "Total" number and then a break out of that number by gender, race, and ethnicity. Many agencies did not provide this break out. Consequently, the percentages for gender, race, and ethnicity in the figures that follow do not add up to the number in the total for that category.

In addition, the **Sentenced**, **Unsentenced-Hold**, and **Pretrial** categories should add up to the **Number of Inmates** category, but for some counties they do not. As a result, the percentage

reported below for these categories does not add up to 100% of the total number of inmates in each quarter.

While we expect reporting compliance will improve over time as counties become more familiar with the requirements, for the reasons outlined above the findings presented in this report should be viewed with caution.

Statewide Results

Beginning in early 2020 the world experienced an outbreak of a novel coronavirus. This outbreak required Colorado to institute measures to slow the spread of the virus to protect the public. The state began implementing most of its measures beginning in March 2020.

According to the Colorado Department of Public Health and Environment, six county jails (Boulder, Denver, Douglas, El Paso, Washington, and Weld) experienced outbreaks of the virus in staff and inmates.¹ While the actions taken by jails to protect their populations are not detailed in this report, the impact of the virus is likely reflected in the analyses that follow.

The number of individuals in jails declined by 28% (11,698 to 8,455) from January 1 to April 1 and again by 15% (8,455 to 7,196) from April 1 to July 1. The total decline from January 1 to July 1 was 38%.

Of the three categories (Sentenced, Un-sentenced Hold, Pretrial) of inmates, the Pretrial category was the largest proportion in all three reporting periods, and increased from 42% on January 1 to 48% on July 1. The proportion of felony pretrial inmates (versus misdemeanor inmates) increased from 72% to 82%.

The percent of individuals whose most serious charge was a municipal code violation was low overall and declined from 3% to 2% in the third reporting period. The number of individuals in administrative segregation declined from the first to the third period but the overall proportion of those in this category stayed the same at 4%.

The number of individuals having a competency evaluation increased from the first to the third period (165 to 263) and the proportion receiving an evaluation increased from 1% to 4% of all inmates.

The number of individuals who were homeless declined from January 1 to July 1, but their overall proportion increased slightly from 17% of inmates to 18%.

The proportion of females declined in all categories from January 1 to July 1, except for administrative segregation where it increased from 16% to 18%, and competency evaluation where it increased from 17% to 19%.

The overall proportion of Blacks in most categories increased from January 1 to July 1 with the exception of those with municipal charges and homeless individuals, where the proportion stayed the same, and administrative segregation where the proportion declined from 19% to 14%.

¹ Source: <https://covid19.colorado.gov/covid19-outbreak-data>

The proportion of Hispanics in all measures increased from January 1 to July 1 except for municipal charge where it decreased from 20% to 11% of inmates.

The average daily population for the state decreased from January 1 to July 1 by 14%. The proportion of females in the population decreased slightly (16% to 15%) and the proportion of Blacks stayed the same at 12%. Hispanics increased from 17% to 19%.

The average length of stay (ALOS) for individuals with felony charges stayed about the same from January 1 to July 1 (47 days versus 46 days). Females with felony charges had a much lower ALOS than males (23 versus 44 days) on January 1. For females with felony charges, ALOS increased by July 1 to 29 days. For males with felony charges, ALOS increased to 47 days.

For Blacks, felony ALOS increased from 41 days to 52 days and was much higher than the ALOS for Whites (38 days on January 1 and 42 days on July 1). For Hispanics with a felony, the ALOS also increased, from 38 days to 43 days.

The ALOS for inmates with a misdemeanor as their highest charge increased slightly from 20 to 21 days by July 1. For females with a misdemeanor charge, their ALOS decreased slightly from 16 to 14 days. Males with a misdemeanor had an increase in ALOS from 18 to 22 days.

For Blacks with misdemeanor charges, the ALOS increased slightly from 30 to 31 days but was much higher than the ALOS for Whites with-misdemeanor charges (18 days). Hispanics with misdemeanor charges also experienced an increase in ALOS, from 15 days on January 1 to 21 days on July 1.

Background

House Bill 19-1297 was enacted on May 31, 2019. It requires all county jails in Colorado to report specific data elements to the Division of Criminal Justice (DCJ) on a quarterly basis. Beginning in January 2020, reports are due to DCJ the third Friday of every quarter. DCJ is mandated to make the data available online one month from the report due date.

Process

DCJ researchers developed an Excel data collection template containing the elements mandated by H.B.19-1297. County jails are required to use this template when submitting their data. Jails submit their data to DCJ, where it is reviewed and loaded into a database. Any problems with the data are communicated back to the county so that they can correct and resubmit the data.

H.B. 19-1297 requires the Department of Public Safety to notify a county that they are not in compliance with the statute if they have not submitted their data 30 days after the due date. See Appendix A for a list of counties that submitted and did not submit reports for each quarter.

To facilitate reporting by jails, DCJ researchers created a website with information about the statute, reporting dates, reporting template, and data documentation. This website is available at:

<https://www.colorado.gov/pacific/dcj-ors/jail-data-collection>

Reporting Periods and Data Elements

The data required by H.B.19-1297 are not records of individuals, but rather counts of specific inmate or jail statuses.

The data items are collected for the following three time periods:

4. The three months prior to the first day of the reporting quarter,
5. On the first day of the reporting quarter (snapshot date),
6. The 365 days prior to the first day of the reporting quarter; because reports are submitted quarterly, the 365-day periods overlap each other.

See Table 1 for the reporting due dates and timeframes.

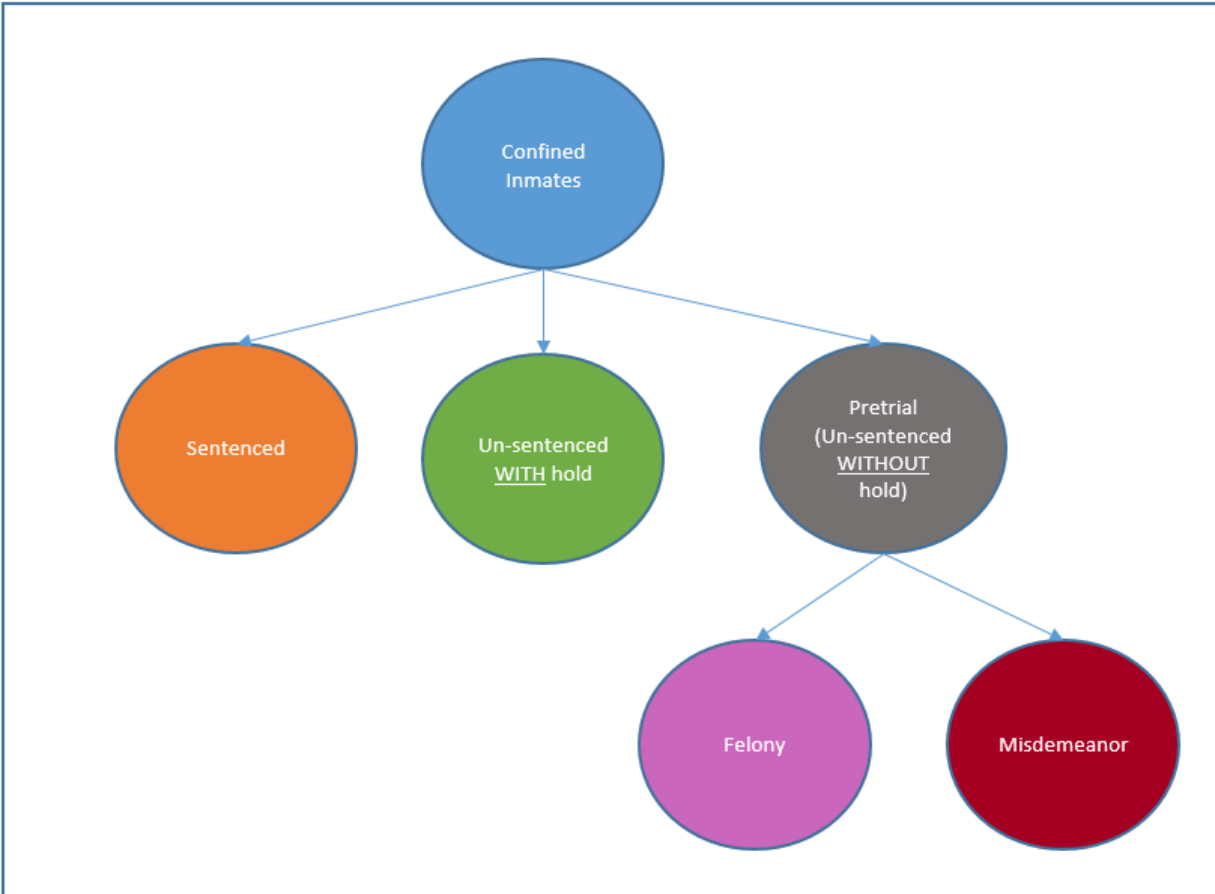

Table 1. H.B. 19-1297 Due dates and reporting timeframes.

Reporting Quarter	Due date	Period 1 Prior Quarter Dates	Period 2 Snapshot Date	Period 3 Prior 365 Days Dates
Q1	January 17, 2020	October 1, 2019 - December 31, 2019	January 1, 2020	January 1, 2019 - December 31, 2019
Q2	April 17, 2020	January 1, 2020 - March 31, 2020	April 1, 2020	April 1, 2019 - March 31, 2020
Q3	July 17, 2020	April 1, 2020 - June 30, 2020	July 1, 2020	July 1, 2019 - June 30, 2020
Q4	October 16, 2020	July 1, 2020 - September 30, 2020	October 1, 2020	October 1, 2019 - September 30, 2020

For counting purposes, counties are required to categorize inmates using a hierarchy that determines the most serious confinement status (sentenced, un-sentenced with a hold, or pretrial²) and most serious case level (felony, misdemeanor) for each person (Figure 1). Some of the required measures are further categorized by gender, race, and ethnicity.

² H.B.19-1297's Un-sentenced-Without Hold category was re-labeled "Pretrial" for this report and on the DCJ dashboard.

Figure 1.

This Report

This report contains the county jail data aggregated at the state level. Individual county-level data are available on the jail data dashboard on DCJ’s website. This dashboard may be found at:

<https://www.colorado.gov/pacific/dcj-ors/ors-jaildata>

The data included in this report are for the first three quarters of 2020. As this report goes to press, Q4 data have not been submitted.

Issues with Reporting and Data Quality

There are 64 counties in Colorado. Of those, 53 operate a county jail.³ Not all counties submitted a report every quarter (Figure 2), and not all counties submitted all required data elements every quarter when they did submit a report. See Appendix A for a complete list of reporting counties.

³ Counties not operating a jail: Archuleta, Cheyenne, Dolores, Hinsdale, Kiowa, Lake, Mineral, Ouray, Phillips, San Juan, Sedgwick.

When counties are unable to provide a data element, H.B. 19-1297 requires them to provide an explanation on reasonable efforts made to collect the data. These explanations appear as "Agency Notes" on the dashboard and are included in Appendix B of this report. When the data counties provided deviated from the statutory definition, agencies also noted this in their "Agency Notes."

Figure 2.

For fifteen of the required measures there is a "Total" number and then a break out of that number by gender, race, and ethnicity. Many agencies did not provide this break out. Consequently, the percentages for gender, race, and ethnicity in the figures that follow do not add up to the number in the total for that category.

In addition, the **Sentenced**, **Unsentenced-Hold**, and **Pretrial** categories should add up to the **Number of Inmates** category, but for some counties they do not. As a result, the percentage reported below for these categories does not add up to 100% of the total number of inmates in each quarter.

Many reported that their jail data management systems did not allow them to report the required measures. See Appendix C for a list of jail management systems used by each county.

While we expect reporting compliance will improve over time as counties become more familiar with the requirements, for the reasons outlined above the findings presented in this report should be viewed with caution.

Statewide Results

Beginning in early 2020 the world experienced an outbreak of a novel coronavirus. This outbreak required Colorado to institute measures to slow the spread of the virus to protect the public. The state began most of its measures beginning in March 2020.

According to the Colorado Department of Public Health and Environment, six county jails (Boulder, Denver, Douglas, El Paso, Washington, and Weld) experienced outbreaks of the virus in staff and inmates.⁴ While the actions taken by jails to protect their populations are not detailed in this report, the impact of the virus is likely reflected in the analyses that follow.

Most of the measures collected by the jails are broken out by race and ethnicity. For comparison purposes Table 2 below contains the forecasted race for Colorado for 2020, for persons 18 and over. Table 3 contains the forecasted ethnicity for the same age group. Blacks comprise 5% of the 18 and over population and Hispanics comprise 22%.

Table 2. 2020 Race, Age 18 and Over

Race	N	Percent
Asian/Pacific Islander	237,706	4%
Black	309,624	5%
Native American	110,752	2%
White	5,153,211	89%
Total	5,811,293	100%

Data source: 2020 population forecast. Office of the State Demographer.

Table 3. 2020 Ethnicity, Age 18 and Over

Ethnicity	N	Percent
Hispanic Origin	1,260,694	22%
Not of Hispanic Origin	4,550,599	78%
Total	5,811,293	100%

Data source: 2020 population forecast. Office of the State Demographer.

Period 1 - Three Months Prior to the Report Date

This timeframe refers to the three months prior to the first day of the reporting quarter. Following are five measures collected for this timeframe:

- Jail Capacity – the number of inmates who can be accommodated in a jail facility based on the number of permanent beds that the facility is designed to hold and the facility's staff, existing programs, and services

⁴ Source: <https://covid19.colorado.gov/covid19-outbreak-data>

- Beds – the number of physical beds in the facility
- Bookings – the number of individuals who were booked into the facility
- Releases – the number of individuals who were released from the facility
- Deaths – the number of individuals who died in custody during this timeframe

Jail Capacity and Beds

The statewide jail capacity increased from 15,459 to 15,656 between the first and third reporting periods (Figure 3). The number of reported available jail beds increases slightly from the first reporting period to the third period: 16,115 to 16,302 (Figure 4).

Figure 3.

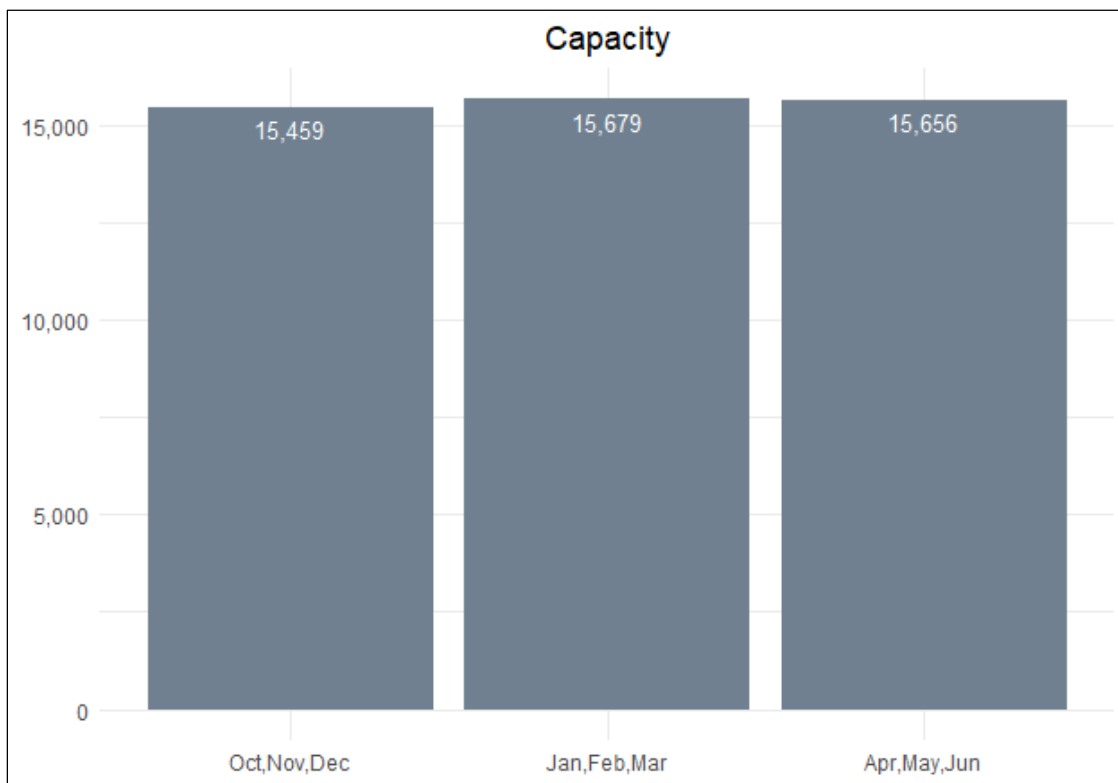

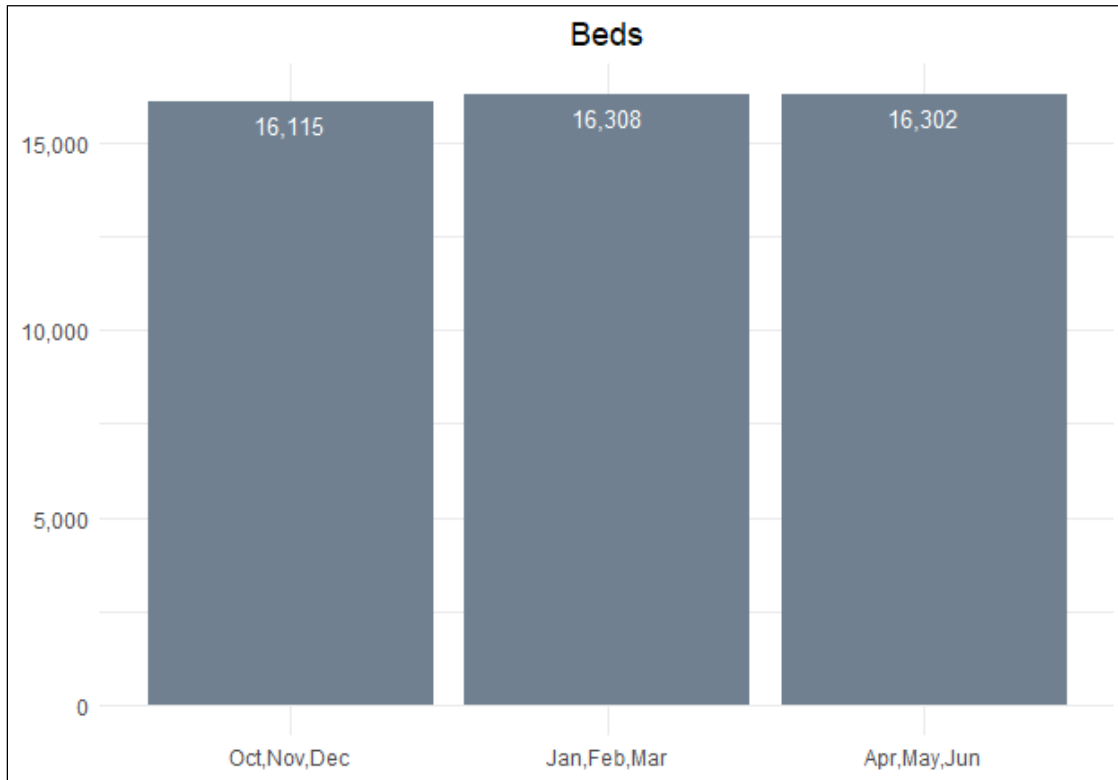

Figure 4.

Bookings, Releases, Deaths

Bookings. The number of bookings in the three months prior to the reporting date declined in Q2 from Q1 by 7% (53,369 to 49,513). A much more dramatic decline occurred between Q2 and Q3, at 51% (49,513 to 24,292) (Figure 5). This decline is most likely due to the pandemic as March 2020 marked the beginning of Colorado’s response to the outbreak and the Q2 report for this measure includes January, February and March. The total drop in bookings from Q1 to Q2 was 55%.

Releases. Similarly, releases declined slightly from Q1 to Q2 (-1%), followed by a 53% drop in releases from Q2 to Q3 (52,846 to 24,854)(Figure 6).

Deaths. The number of deaths declined from Q1 to Q2 (9 to 4) and then rose again in Q3 to 10 deaths (Figure 7).

Figure 5.

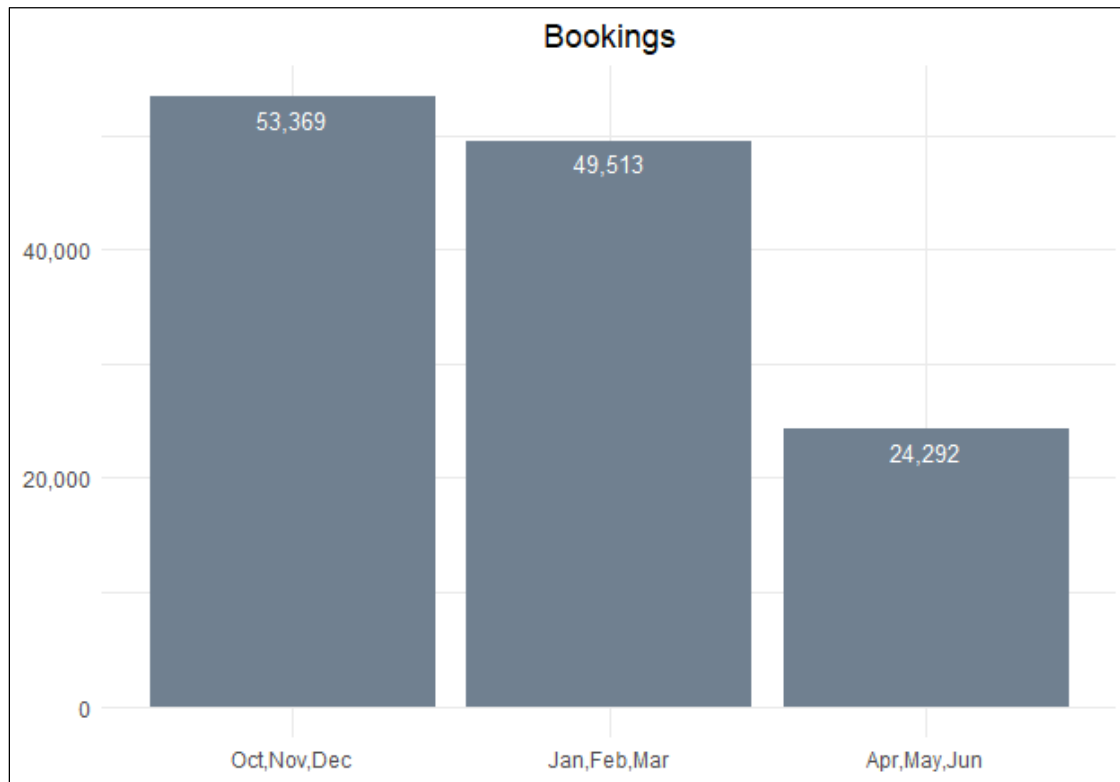

Figure 6.

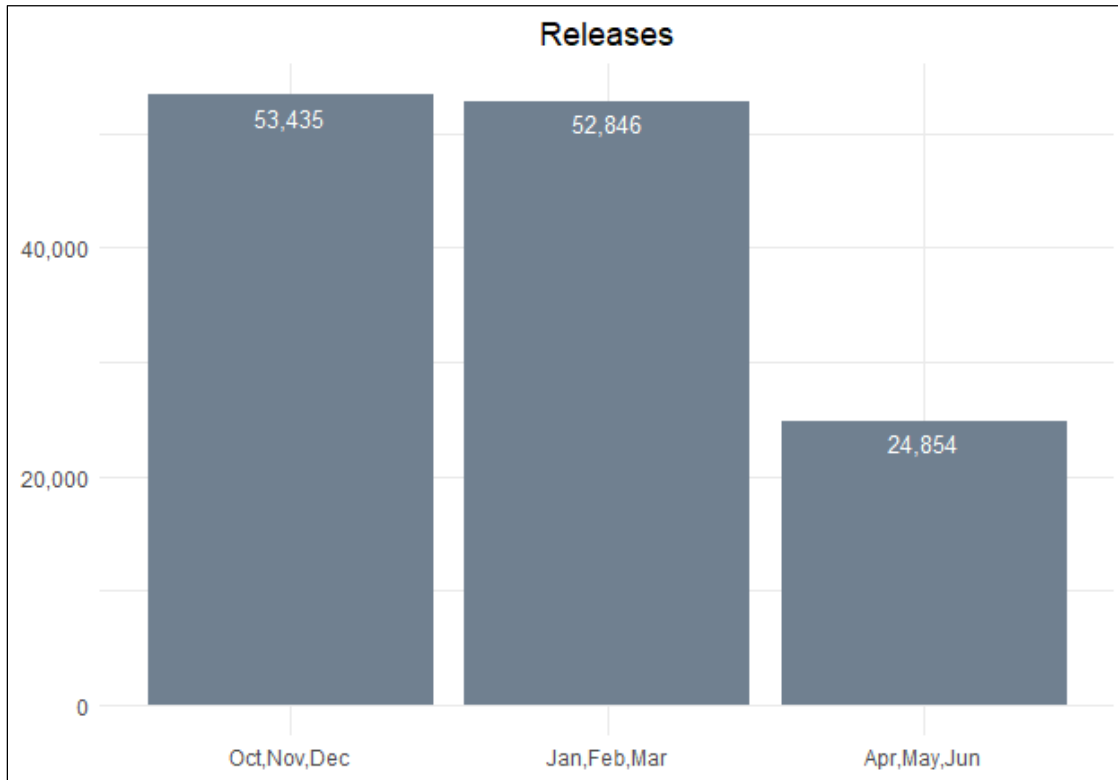

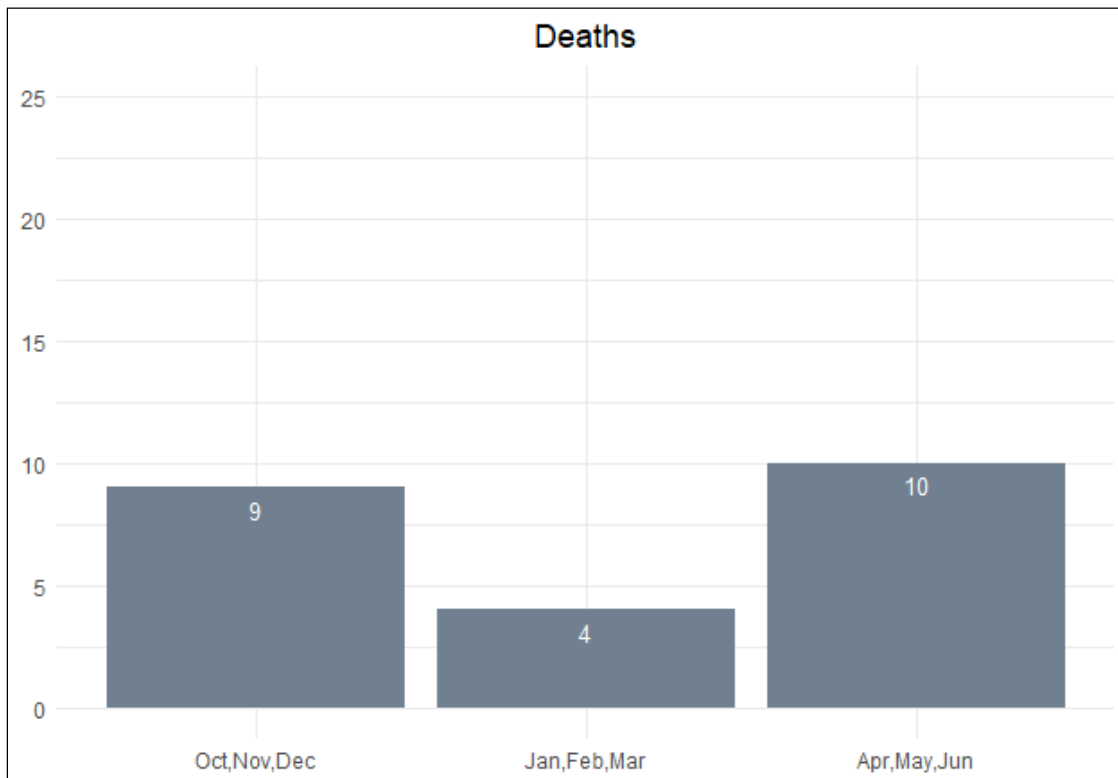

Figure 7.

Period 2 - On the First Day of the Reporting Quarter

The measures in this timeframe are snapshot counts of inmates on the first day of the reporting quarter (January 1, April 1, July 1). These are counts of inmates in various categories on that day. The measures captured in this timeframe are also broken out by race, ethnicity, and gender.

The first measure captured is **number of inmates**. This measure is further broken out into the following three mutually exclusive groups:

- **Sentenced:** an individual who is confined and actively serving a sentence
- **Unsentenced – Hold:** an individual who has not been sentenced but has a “Hold.” This refers to a mechanism preventing an individual’s release from custody on bail, including a hold on behalf of another jail or criminal justice agency such as a parole hold, or a probation hold.
- **Pretrial:** individuals who are not sentenced and do not have a hold, but are awaiting the outcome of their case.

In the figures below these measures are presented as a percent of the total **number of inmates**.

Pretrial inmates are further categorized as **felony pretrial** or **misdemeanor pretrial** depending on the level of their most serious case.

The remaining measures in this timeframe (Municipal Charge, Administrative Segregation, Competency Evaluation and Homeless) are presented as a percent of the total number of inmates.

Number of inmates

The **number of inmates** measure refers to the number of inmates that were in the facility on the first day of the reporting period. This number declined by 28% (11,698 to 8,455) from January 1 to April 1 and again by 15% (8,455 to 7,196) from April 1 to July 1 (Figure 8). The total decline from January 1 to July 1 was 38%.

Of the number of inmates in the facility, the percent of females declined from 17% to 13% of inmates from January 1 to July 1, and males increased from 83% to 87% (Figure 9).

The proportion of Blacks increased from 13% on January 1 to 15% on July 1 (Figure 10). The percent of Hispanics also increased from 22% on January 1 to 31% on July 1 (Figure 11).

Figure 8.

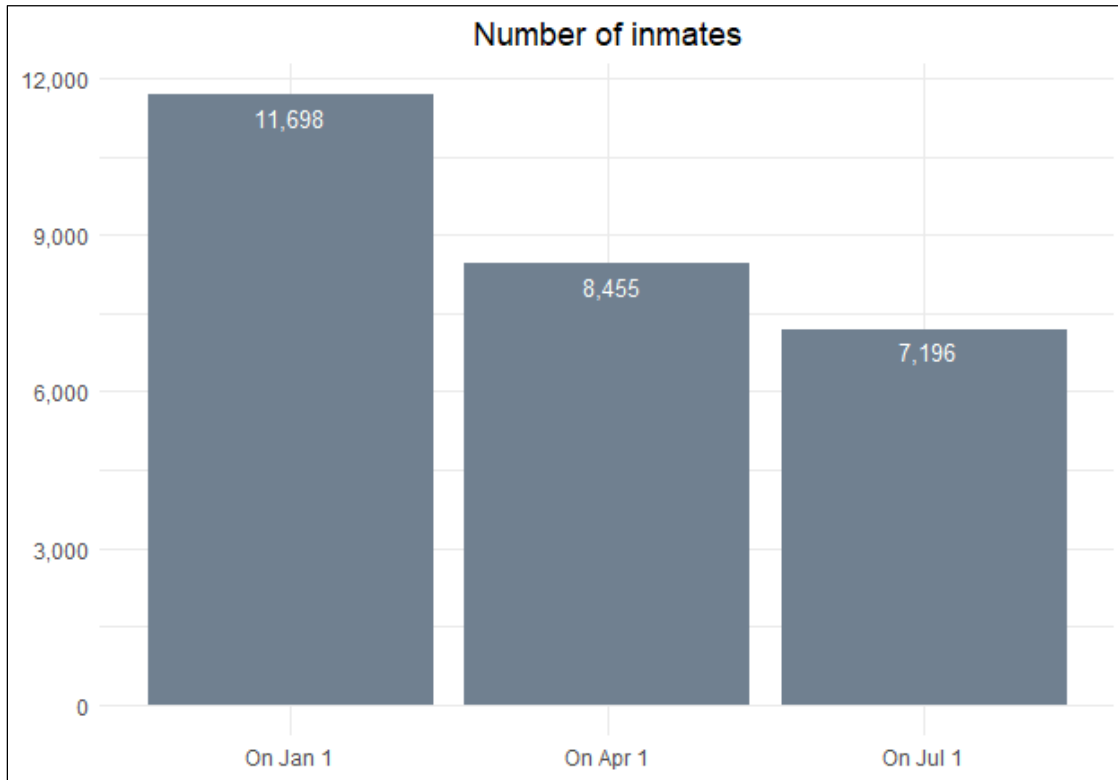

Figure 9.

Figure 10.

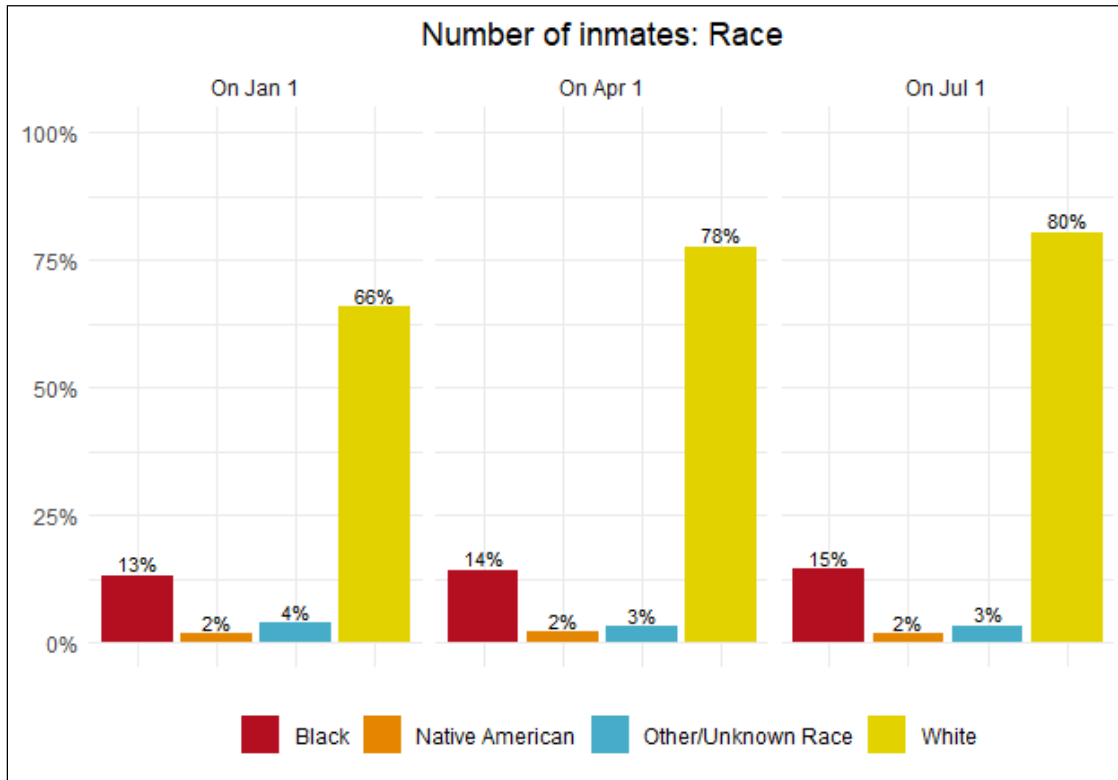

Figure 11.

In all Colorado counties with population greater than 100,000, the incarceration rate per 100,000 dropped from January 1 to July 1 (Figure 12).

The percent of occupied capacity, as measured by the number of individuals in the facility on the reporting date divided by the capacity, declined from 76% on January 1 to 46% of capacity on July 1 (Figure 13).

Figure 12.

*2020 Colorado population forecast, age 18 and over. Population data source: Colorado Office of the Demographer.

Figure 13.

Sentenced

Individuals are categorized into three groups: Sentenced, Unsented – Hold, and Pretrial. The **sentenced** measure is a count of the number of inmates in the facility on the first day of the reporting quarter *who were sentenced to jail*.

On January 1, 22% of individuals were sentenced to the facility compared to 24% on July 1 (Figure 14). On January 1, 17% of those sentenced were female. On July 1, the female population had dropped to 13% (Figure 15). Blacks were 9% of those in the sentenced category on January 1 and their proportion increased to 11% on July 1 (Figure 16). White individuals were 62% of the sentenced category on January 1 and 77% on July 1. The proportion of Hispanics in the sentenced category increased from 20% on January 1 to 30% on July 1 (Figure 17).

Figure 14.

Figure 15.

Figure 16.

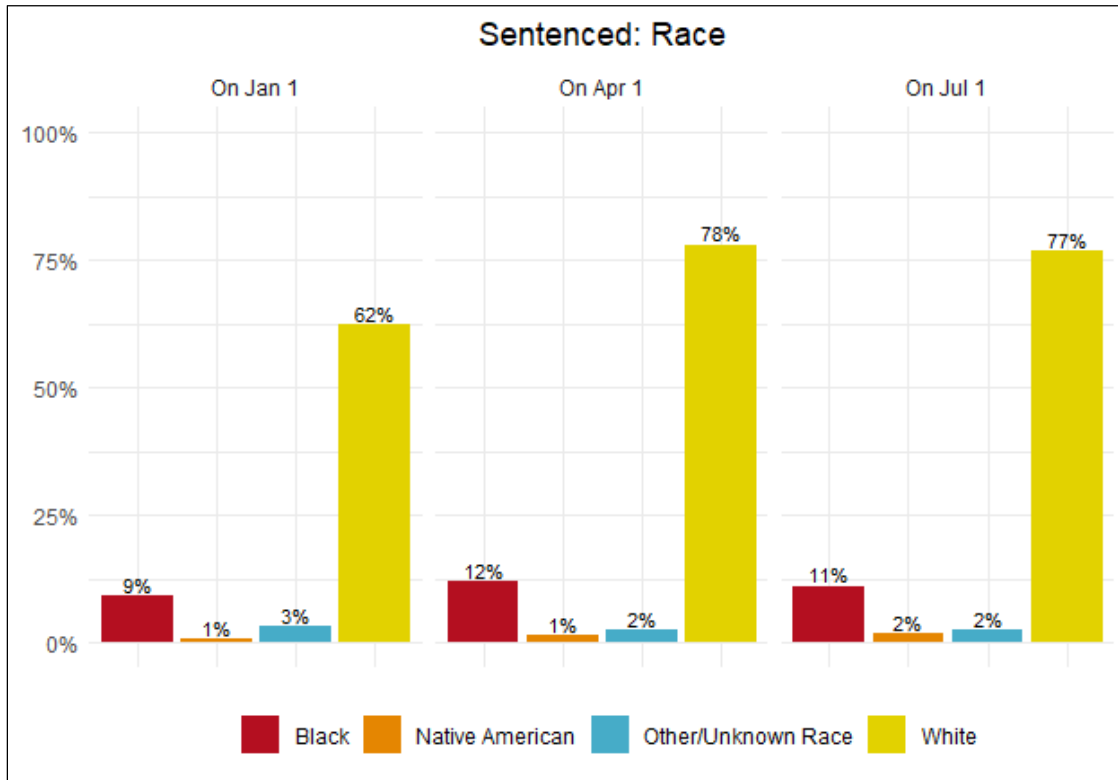

Figure 17.

Unsentenced – Hold

The **unsentenced-hold** measure counts individuals who were in the facility because of a “hold.” For example, holds include requests from probation or parole to detain the individual. On January 1, 20% of inmates were in the facility because of a hold. By July 1, this category increased to 29% of inmates (Figure 18). Females comprised 15% of those in the unsentenced – hold category on January 1, and 12% on July 1 (Figure 19). The percent of Blacks in the unsentenced- hold category increased from 14% on January 1 to 18% on July 1 (Figure 20). The proportion of Hispanics in this category also increased from 22% on January 1 to 27% on July 1 (Figure 21).

Figure 18.

Figure 19.

Figure 20.

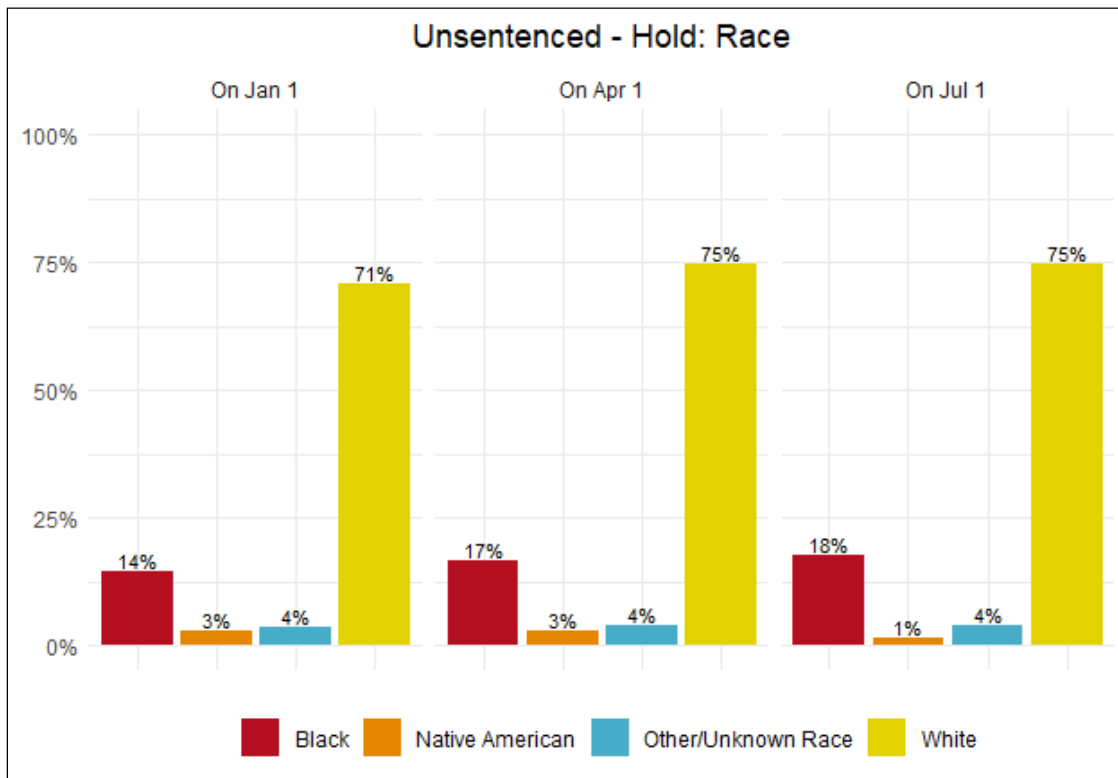

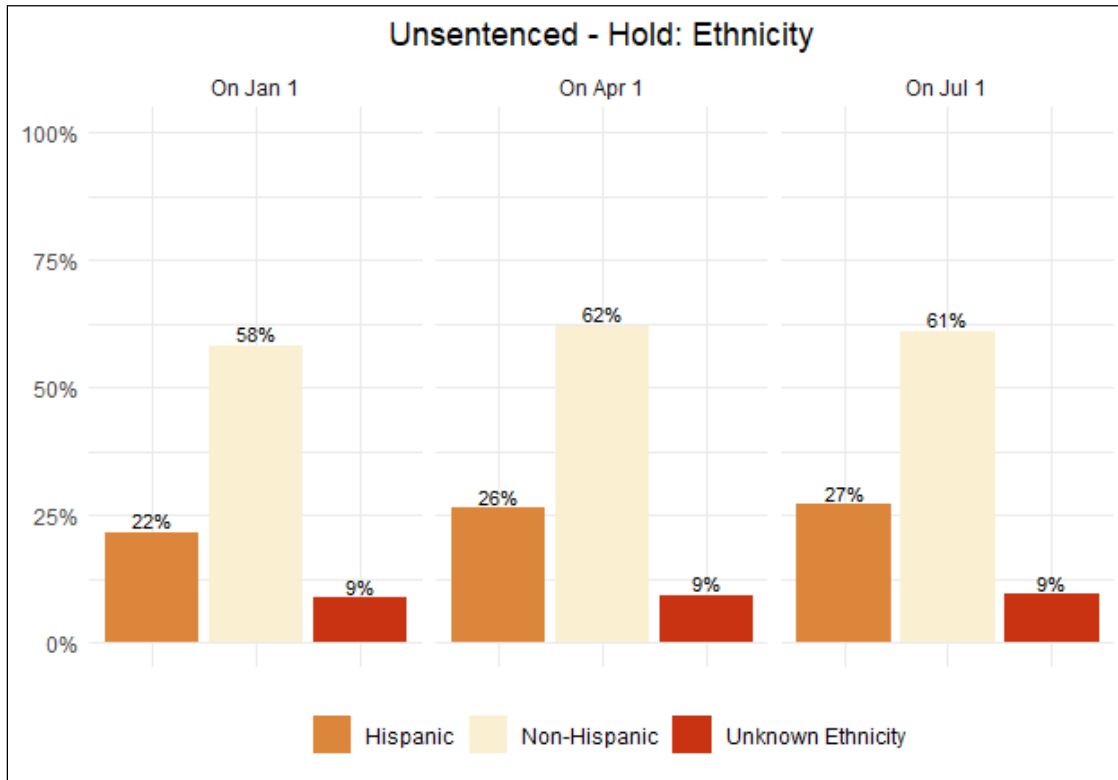

Figure 21.

Pretrial

The **pretrial** measure is the third and final of the main inmate groupings. It counts those individuals in the facility who were not sentenced and did not have a hold, but are in the facility awaiting the outcome of their case.

The percent of pretrial inmates increased from 42% on January 1 to 48% on July 1 (Figure 22). The percent of pretrial individuals who were female dropped from 16% on January 1 to 12% on July 1 (Figure 23). The proportion of Whites in the pretrial category increased from 62% to 75%. The percent of Blacks in the pretrial population increased from 10% on January 1 to 14% on July 1 (Figure 24). Hispanics in this category also increased from 20% to 27% (Figure 25).

Figure 22.

Figure 23.

Figure 24.

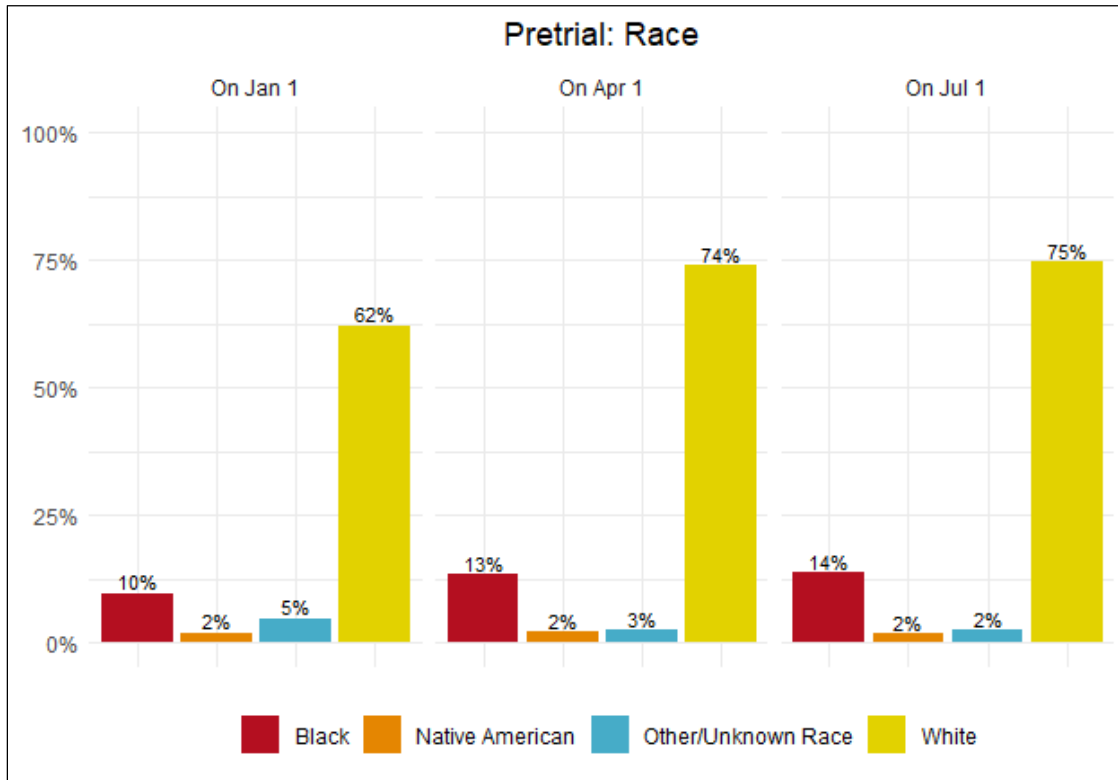

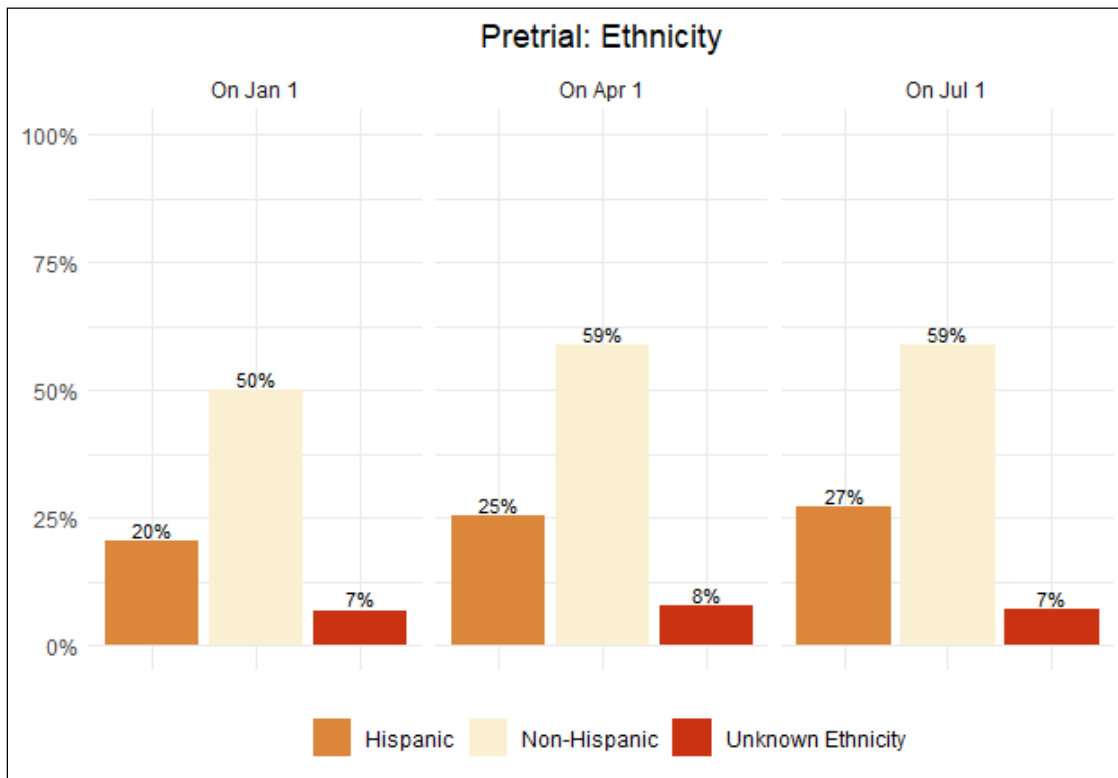

Figure 25.

Pretrial Felonies

Pretrial inmates were further divided into felonies or misdemeanors, depending on their highest-level offense.

On January 1, 72% of pretrial inmates had felony charges but by July 1, 82% of pretrial inmates had felony charges (Figure 26). The proportion of females in pretrial confinement for a felony was 15% on January 1 and declined to 12% on July 1 (Figure 27). Blacks in the pretrial felony category increased from 11% on January 1 to 15% on July 1 (Figure 28) and the proportion of Hispanic inmates increased from 21% to 27% (Figure 29).

Figure 26.

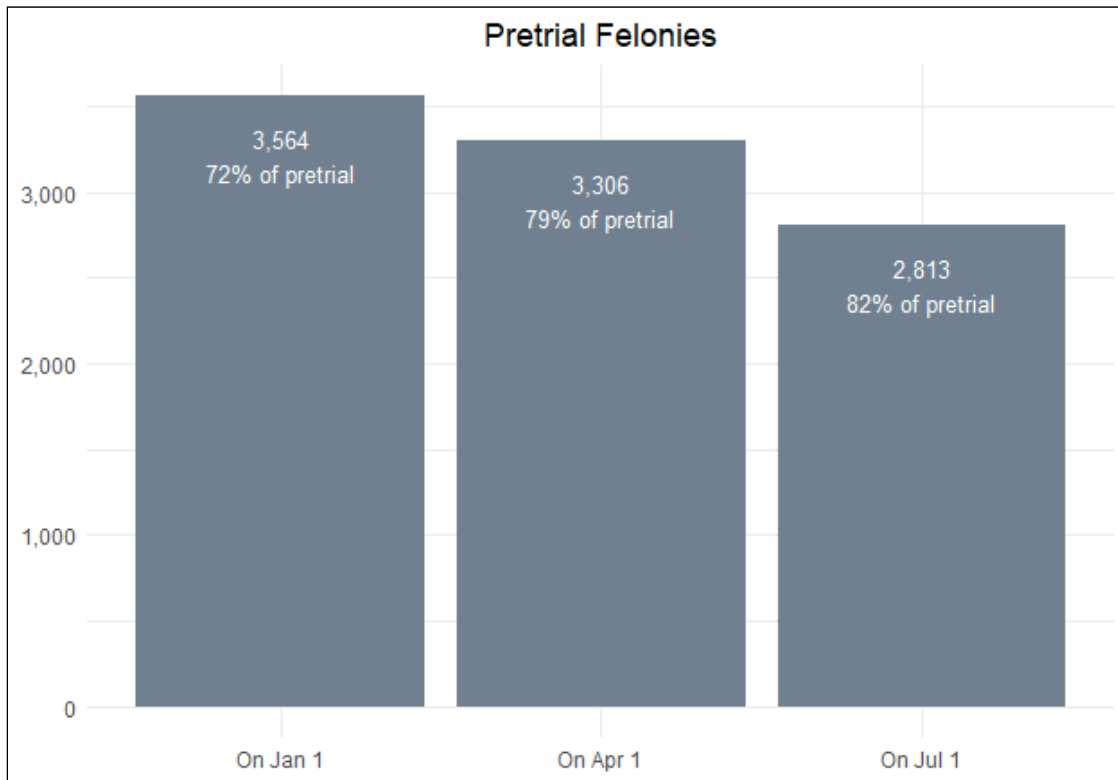

Figure 27.

Figure 28.

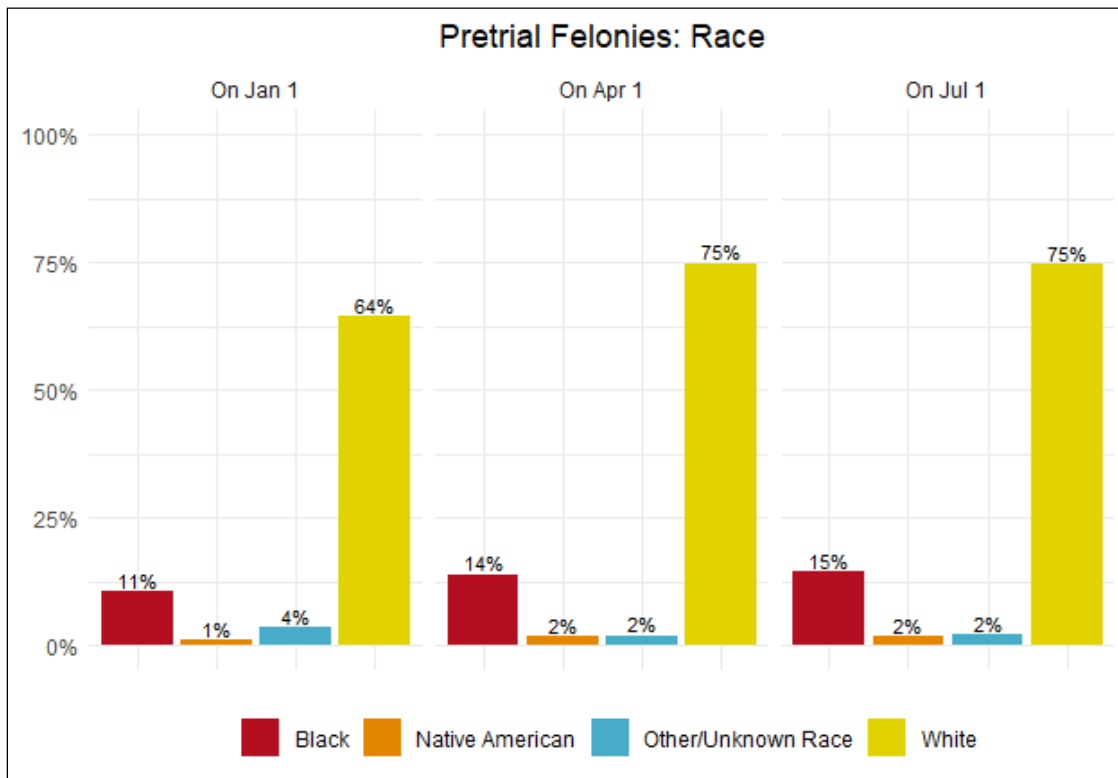

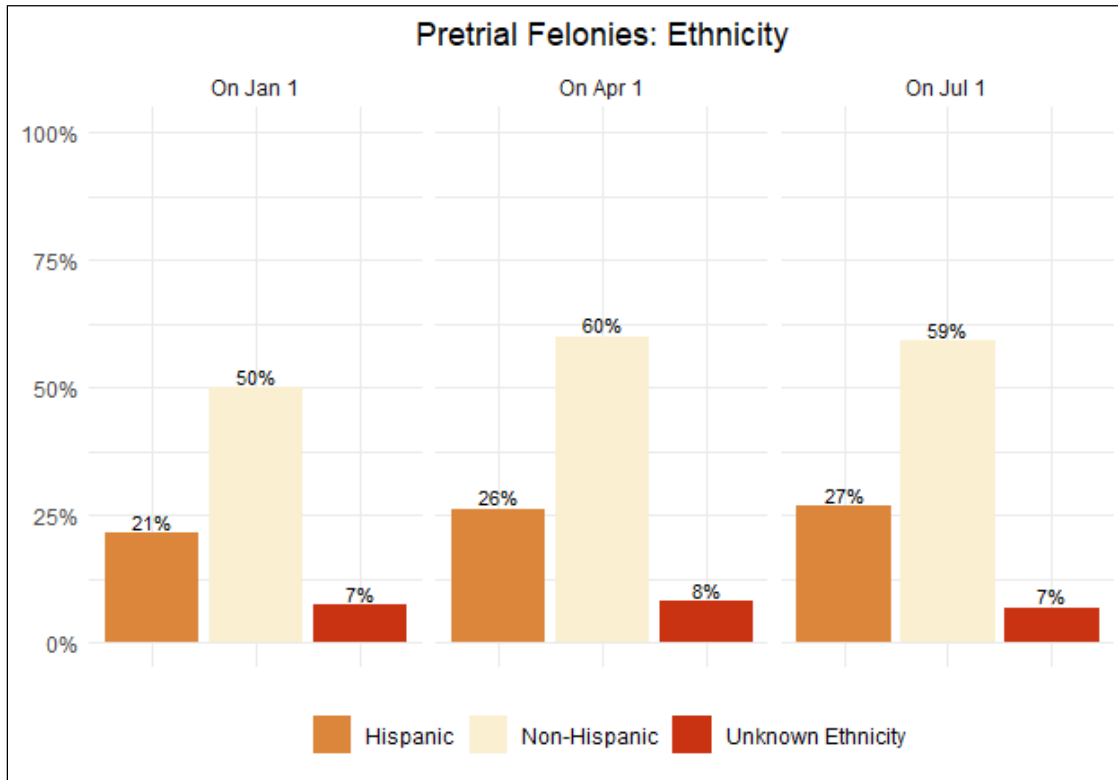

Figure 29.

Pretrial Misdemeanors

The **pretrial misdemeanors** measure is a count of those who were in the pretrial category, but with a misdemeanor-level offense as their most serious charge.

On January 1, pretrial misdemeanors comprised 24% of the pretrial group but by July 1, this proportion dropped to 18% (Figure 30). Females in this category dropped from 16% to 13% on July 1 (Figure 31). The proportion of Whites increased from 61% to 76% by July 1. The proportion of Blacks in this category increased from 9% to 11% (Figure 32) and the proportion of Hispanics also increased from 20% to 27% (Figure 33).

Figure 30.

Figure 31.

Figure 32.

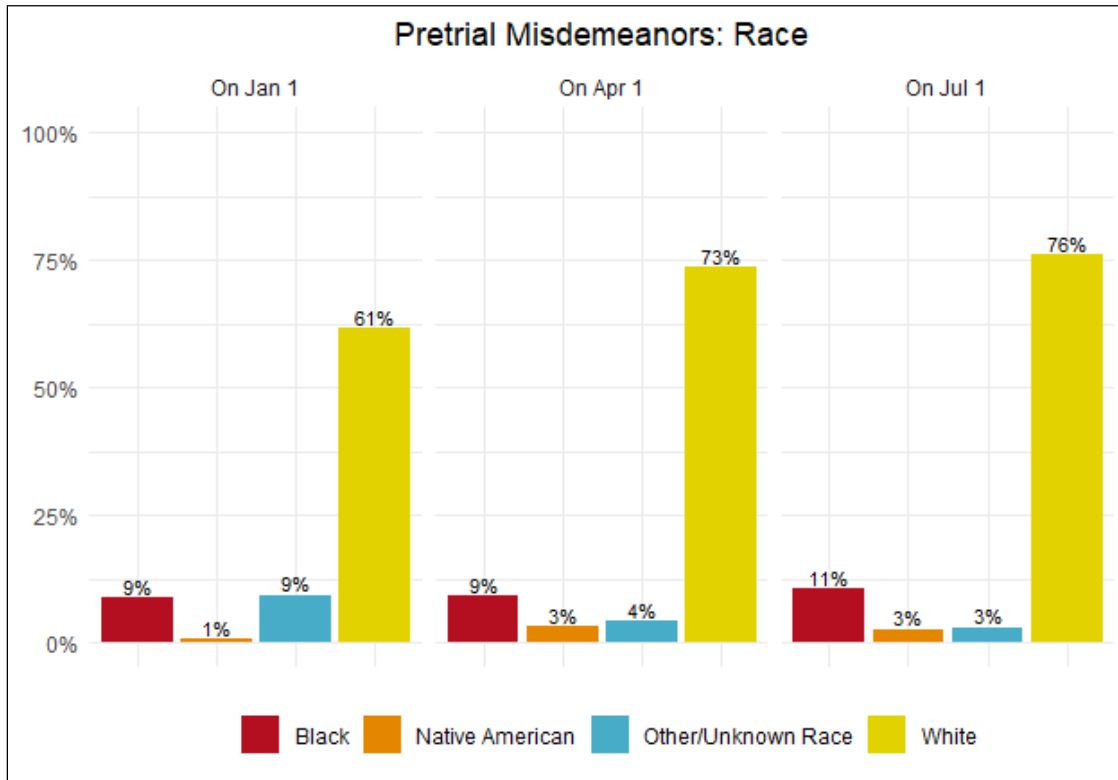

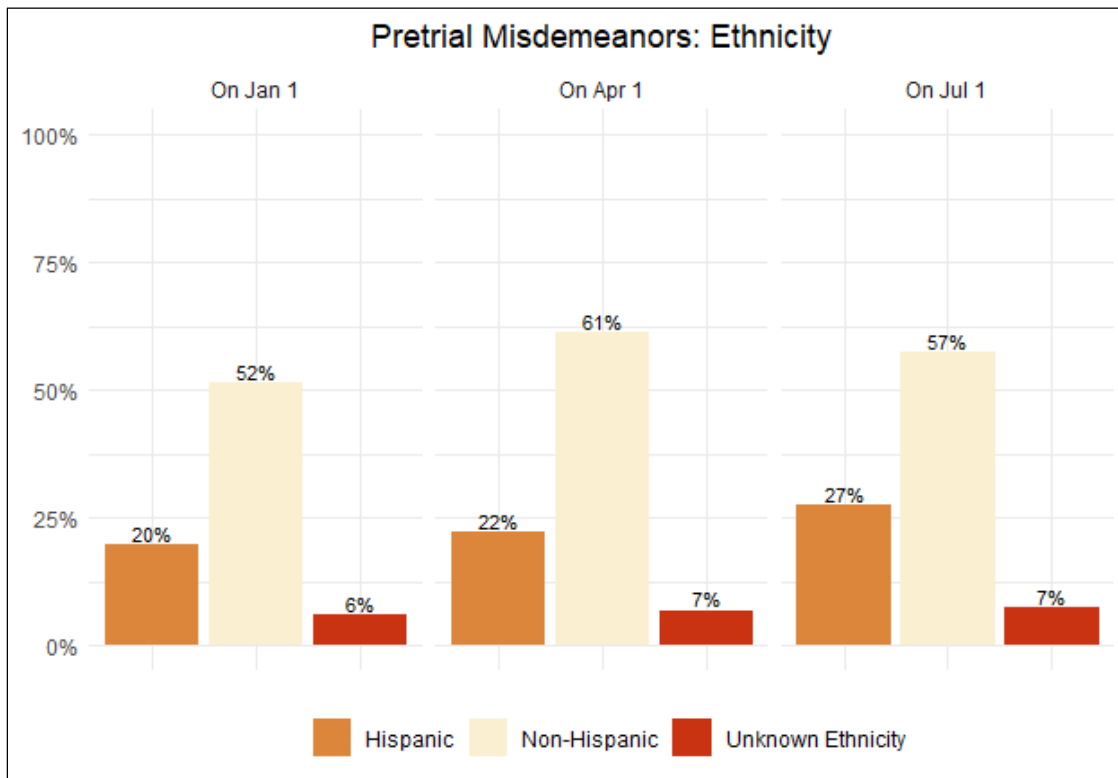

Figure 33.

Municipal Charge

The **municipal charge** measure is a count of those whose most serious offense is a municipal charge rather than a state statute charge. The percent of individuals in this category dropped from 3% on January 1, to 2% on July 1 (Figure 34). Females comprised 23% of this category on January 1, but dropped to 13% on July 1 (Figure 35). The proportion of Blacks in this category stayed the same on January 1 and July 1 at 19%, dropping on April 1 to 17% (Figure 36). The proportion of Hispanics in this category dropped from 20% on January 1 to 11% on July 1 (Figure 37).

Figure 34.

Figure 35.

Figure 36.

Figure 37.

Administrative Segregation

The **administrative segregation** measure counts those who are in a restricted confinement in which the individual is allowed outside of his or her cell for two or fewer hours per day.

The total number of individuals in this category dropped from 512 on January 1 to 294 on July 1. However, the proportion of those in this category remained the same at 4% across all three reporting periods (Figure 38). The proportion of females in administrative segregation increased slightly from 16% on January 1 to 18% on July 1 (Figure 39). The proportion of Blacks in this category decreased from 19% on January 1 to 14% on July 1 (Figure 40). Hispanics in this category increased from 27% to 29% (Figure 41).

Figure 38.

Figure 39.

Figure 40.

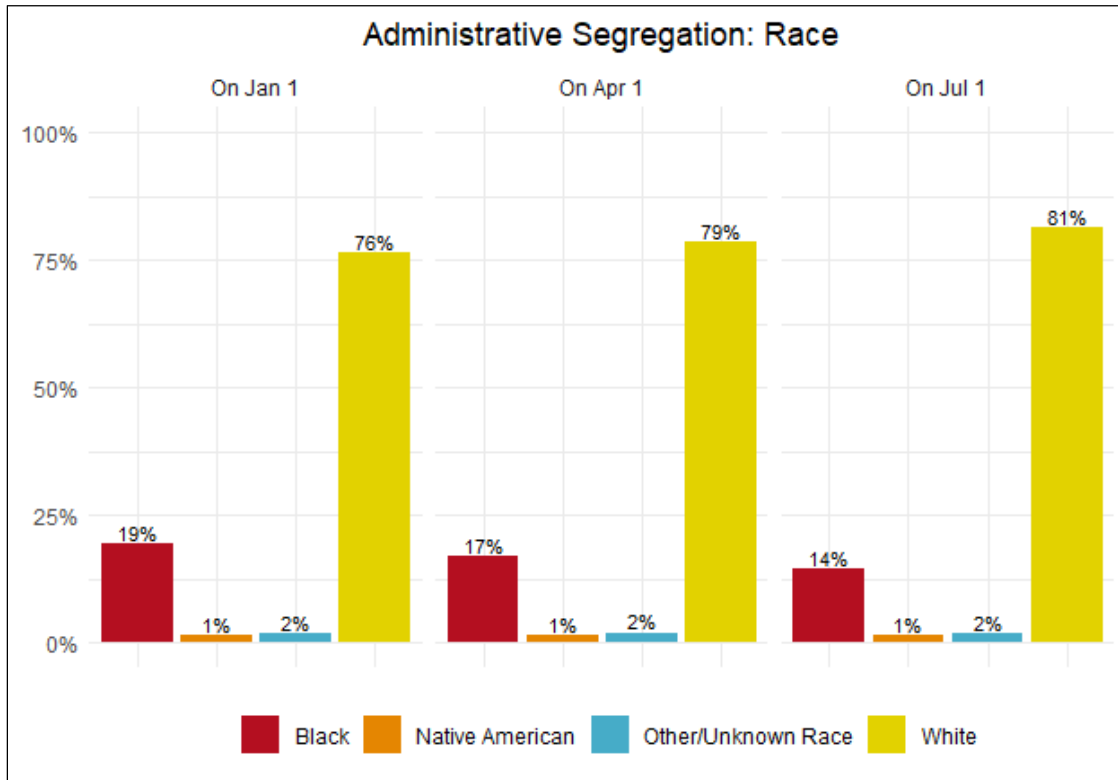

Figure 41.

Competency Evaluation

The **competency evaluation** measure counts those individuals who are awaiting a competency evaluation, competency hearing, or restoration hearing.

The total number of individuals in this category increased from 165 on January 1 to 263 on July 1. The proportion of individuals in this category increased from 1% of the total number of inmates on January 1 to 4% on July 1 (Figure 42). Of those, 17% were females on January 1, and 19% were females on July 1 (Figure 43). The proportion of Blacks increased from 4% to 17% of inmates over this period (Figure 44). Those in this category who were Hispanic also increased from 15% to 20% (Figure 45).

Figure 42.

Figure 43.

Figure 44.

Figure 45.

Homeless

The **homeless** measure counts individuals who lacked a fixed, regular, and adequate nighttime residence. In H.B.19-1297, an individual is considered homeless if the individual's primary address is recorded as follows:

- Transient;
- A supervised publicly or privately operated shelter designed to provide temporary living accommodations, including welfare hotels, congregate shelters, and transitional housing for persons with behavioral or mental health disorders; or
- A public or private place not designed for, nor ordinarily used as, a regular sleeping accommodation for human beings, including but not limited to an automobile, a park, an abandoned building, a bus or train station, or a similar setting.

While the total number of individuals recorded as homeless dropped from 2,010 on January 1 to 1,280 on July 1, the proportion of all individuals who were homeless increased slightly from 17% to 18% on July 1 (Figure 46). The percent of those homeless who were female dropped from 15% on January 1 to 13% on July 1 (Figure 47). The proportion of homeless individuals who were Black dropped from 18% to 17% on July 1 (Figure 48) and the proportion of those homeless who were Hispanic increased from 18% to 21% (Figure 49).

Figure 46.

Figure 47.

Figure 48.

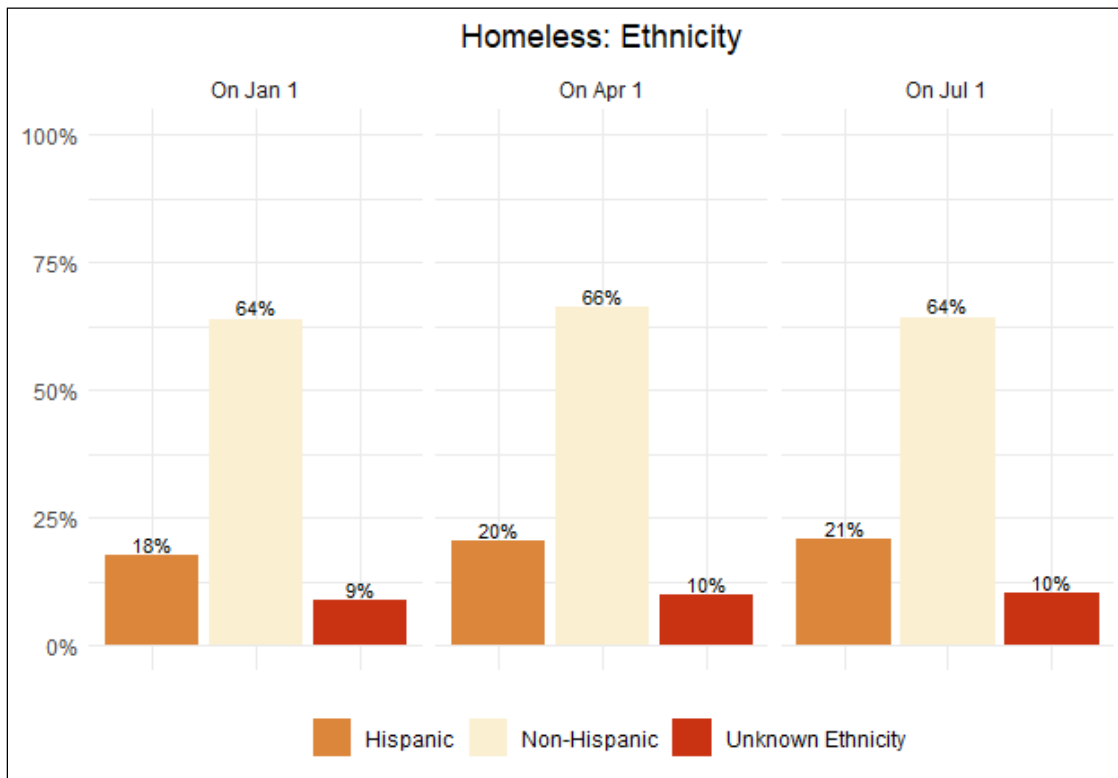

Figure 49.

Period 3 - 365 Days Prior to the Report Date

The measures in this timeframe refer to the 365 days prior to the first day of the reporting period (January 1, April 1, July 1).

Average Daily Population Last 365 Days

The **average daily population** is the number of confined inmates each day for the prior 365 days, divided by 365. It measures the average number of inmates in the facility on a single day over the past 365 days.

The average daily population dropped by 4% on January 1 to April 1 (12,599 to 12,153), followed by an 11% drop (12,153 to 10,784) from April 1 to July 1 (Figure 50). The total drop from January 1 to July 1 was 14% (12,599 to 10,784).

The proportion of females dropped slightly from 16% to 15% during that time period (

Figure 51). Blacks made up 12% of the average daily population across the three time periods (Figure 52). The proportion of Hispanics increased slightly from 17% on January 1 to 19% on July 1 (Figure 53).

Figure 50.

Figure 51.

Figure 52.

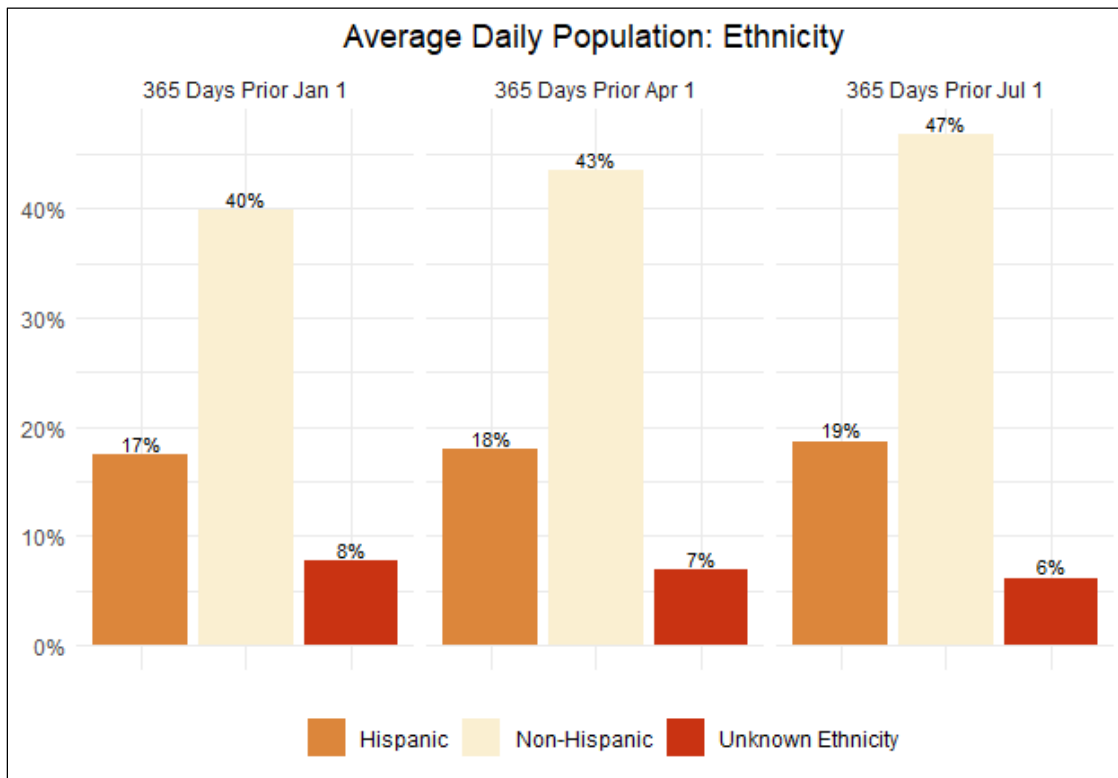

Figure 53.

Average Length of Stay

The **average length of stay (ALOS)** measure is a count of how many days an individual is in jail, on average.⁵

Figure 54 shows the ALOS for individuals whose most serious charge was a felony. The ALOS dropped slightly from the January 1 period to the July 1 period (47 days to 46 days). For females with a felony charge, the ALOS increased from 23 days to 29 days (Figure 55). For males with a felony charge, the ALOS increased from 44 days to 47 days.

The ALOS for Blacks with a felony charge increased from 41 days to 52 days and increased for Whites from 38 days to 42 days (Figure 56). The ALOS also increased for Hispanics with a felony charge, from 38 days to an average of 43 days (Figure 57).

Figure 54.

⁵ Average length of stay is calculated as the sum of all the days spent in jail for all releases over the past 365 days, divided by the number of individuals released in that time period. The number of releases in each period appears in the figures below in parentheses.

Figure 55.

Figure 56.

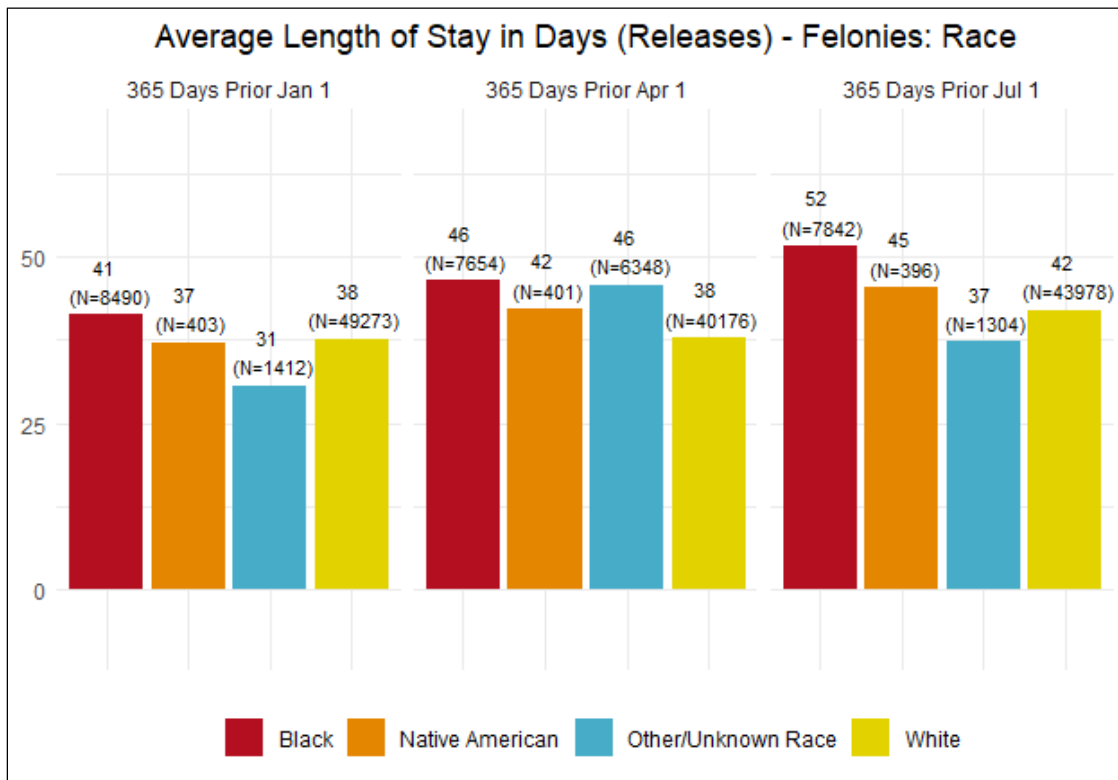

Figure 57.

Figure 58 shows the ALOS for individuals whose most serious offense is a **misdemeanor**. The ALOS for these individuals increased from 20 to 21 days. The ALOS for females with misdemeanor charges decreased from 16 days to 14 days (Figure 59). For males with misdemeanor charges, the ALOS increased from 18 days to 22 days.

The ALOS for Blacks with misdemeanor charges increased slightly from 30 to 31 days (Figure 60). Whites in this category had a much lower ALOS of 18 days, which increased to 21 days on April 1 but dropped to 18 days on July 1. The ALOS for Hispanics with misdemeanor charges increased from 15 days on January 1 to 21 days on July 1 (Figure 61).

Figure 58.

Figure 59.

Figure 60.

Figure 61.

Summary. The findings presented here reflect the data provided by county jails pursuant to H.B.19-1297 for the first three quarters of 2020. During this period, the novel coronavirus pandemic led to significant changes in criminal justice operations, including local arrest and detention practices. The reduction in the number of individuals in jail during the three reporting periods reflect these changes in practice.

However, data quality and completeness represent significant challenges. Some jail data management systems do not capture the data elements required in H.B.19-1297, and some jails provided inconsistent information that they did not correct or modify. For this reason, the findings should be interpreted with caution.

Appendix A – Counties Who Reported

Table 4 below shows which counties submitted a report for each reporting period.

Table 4. Who reported by reporting quarter

County	Q1	Q2	Q3
Adams	Yes	Yes	Yes
Alamosa	Yes	Yes	Yes
Arapahoe	Yes	Yes	Yes
Baca	Yes	Yes	Yes
