

Summary of Law Enforcement and District Attorney Reports of Student Contacts

Academic Year 2023-2024

Pursuant to House Bill 15-1273

Prepared for the Education and Judiciary Committees of the Colorado State House and Senate

May 2025

Preface

In 2015, the Colorado General Assembly passed House Bill 1273 (see §24-33.5-503(1)(aa) & (2), C.R.S.; §20-1-113, C.R.S.; and §22-32-146(5), C.R.S.), mandating local law enforcement agencies and district attorney offices to annually report specific information regarding contacts with students to the Division of Criminal Justice (DCJ) within the Colorado Department of Public Safety. These agencies must report every incident that resulted in a student’s arrest, summons, or ticket during the academic year for an offense that occurred on school grounds, in a school vehicle, or at a school activity or event sanctioned by public elementary schools, middle or junior high schools, or high schools.

H.B. 15-1273 mandated DCJ to annually analyze and report these data disaggregated by law enforcement agency, district attorney office, and school. This report is presented to the Judiciary and Education Committees of the General Assembly in tandem with a corresponding web-based interactive data dashboard that provides information on individual schools and law enforcement agencies. ***These two reporting mechanisms - this report and the data dashboard - should be viewed together since only the report contains the analyses of all incidents and information regarding the development of the data sets used in the report and in the dashboard.*** The interactive website may be found at dcj.colorado.gov/dcj-offices/ors/dashb-student.

Every effort was made to protect the identity of individual students. Disaggregating the data by individual school required special precautions to protect student privacy. To this end, schools with five or fewer incidents were placed into a category titled “Schools with few incidents.” Additionally, when only one individual fell into a race/ethnicity category in a specific school, that case was placed into the “other or unknown” race/ethnicity category to protect the identity of the student.

For information on incidents by school, school district, and law enforcement agency, please go to the following website to access the data dashboard: dcj.colorado.gov/dcj-offices/ors/dashb-student.

The State of Colorado is committed to providing equitable access to our services to all Coloradans - [View the Accessibility, Interpretation & Translation Support page](#).

Executive Summary

Background. In 2015, the Colorado General Assembly passed House Bill 15-1273, mandating local law enforcement agencies to annually report specific information to the Division of Criminal Justice (DCJ) within the Colorado Department of Public Safety regarding law enforcement contact with students. These agencies must report every incident resulting in a student’s arrest, summons, or ticket during the prior academic year for an offense that occurred at a public elementary school, middle or junior high school, or high school; in a school vehicle; or at a school activity or sanctioned event. In addition, H.B. 15-1273 mandated that each district attorney annually reports to DCJ the name of any student who was granted pre- or post-filing juvenile or adult diversion for a ticket, summons, or offense that occurred at a public elementary school, middle or junior high school, or high school; in a school vehicle; or at a school activity or sanctioned event. The DCJ provides data collection instruments on its website for law enforcement agencies and district attorney offices to use for the submission of this information. This report covers incidents reported for the 2023-2024 academic year.

One hundred seventy-seven (177) law enforcement agencies provided data to DCJ for this study. Of these, forty-six (46) law enforcement agencies reported no incidents, and 131 agencies reported 5,057 qualifying incidents in 567 public schools for the 2023-24 academic year. This compares with 157 agencies reporting 4,810 incidents in 513 public schools (51 reported no incidents) in the 2022-23 school year. There are approximately 240 law enforcement agencies in Colorado that are expected to report to DCJ. Since the passage of H.B. 15-1273, DCJ has made significant efforts to inform law enforcement agencies about their reporting requirements and to assist them in submitting their reports. A total of 29 agencies responded, indicating that they either do not have schools in their jurisdictions or that the reports are submitted by other agencies. The reasons why some law enforcement agencies still have not reported data to the DCJ remain unclear. Therefore, the results presented in this report and on the dashboard should be interpreted with these limitations in mind.

Twenty-one of the 22 district attorney offices submitted information to DCJ for the 2023-2024 academic year.

Law enforcement incident reports. The majority (79%) of the 5,057 incidents resulted in law enforcement officers issuing a ticket or summons, 10% resulted in an arrest, and 11% in Other or Unknown types of contact. Fifty-eight percent (58%) of incidents reported by law enforcement agencies involved male students, 41% involved female students, and for one percent of the students the gender was unknown. In terms of race/ethnicity, 46% of the students involved in the incidents reported by law enforcement were White, 38% were Hispanic/Latino, 9% were African American/Black, and in 7% of incidents race/ethnicity was “other or unknown.” The Colorado Department of Education reports the race/ethnicity distribution for all schools at the beginning of the academic year 2023-24 as follows: 51% White, 35% Hispanic, 5 % Black, and 9% as “other, Asian/Native Hawaiian/American Indian/Alaska Native.”

Marijuana-related offenses, assault, and disorderly conduct were the most frequently occurring offenses. The distribution of these offenses varied by race/ethnicity. For White students, 26% were

contacted for marijuana offenses, 15% for assault, and 12% for disorderly conduct offenses. Hispanic/Latino students were most likely to have contact for a disorderly conduct offense (24%), followed by marijuana (23%), and assault (22%). The distribution of offenses for contacts with African American/Black students was 39% assault and 16% for disorderly conduct and marijuana.

Weapons were reported to be present in 25% of incidents; however, this figure includes 1,036 (82%) instances when the weapon was a fist, feet, arm, or leg (i.e. personal weapon). Sixty-nine incidents, accounting for about 5% of all incidents analyzed, involved a firearm.

About 71% of the incidents reported by law enforcement agencies occurred in five judicial districts: the 1st, 4th, 17th, 18th, and 19th.

For information by law enforcement agency, school district, and school, please use the following link to access an interactive data dashboard: dcj.colorado.gov/dcj-offices/ors/dashb-student.

Court case outcome. H.B. 15-1273 requires that DCJ obtain the court disposition for the reported incident when this information is available. Using data from the Colorado State Judicial ICON data system (which does not include Denver County Court), court case records were found for 1,046 of the law enforcement records. Note that cases filed in county or district court are likely to reflect more serious charges, include multiple offenses, or involve students with prior infractions. A youth was convicted in 30% of cases, while all charges were dismissed in 43% of cases, and 27% of cases had not yet reached a disposition. Male students made up a majority of the court case outcomes, accounting for 67%, compared to female students. Charges were dismissed more frequently for White students (48%) compared to other race/ethnicity groups.

Sentencing information was available for 296 cases and the most serious or restrictive sentence is reported. Of these, in 52% of the cases received a sentence to probation/deferred judgment, 26% received diversion, 9% received fines/fees, and 7% received unsupervised probation/deferred judgment. Sixteen youths were either sentenced to the Department of Youth Services (count = 4), the Department of Corrections (count = 1), juvenile detention (count = 7), community service (count = 3), or jail (count = 1).

District attorney diversion cases. Twenty-one district attorney (DA's) offices reported 760 pre- and post-filing diversion cases with one DA's office reporting no cases. White students represented 58% of diversion cases, Hispanic/Latino students represented 28%, and African American/Black students represented 7% of the cases. For the remaining 7% of cases, race/ethnicity was listed as other/unknown. DA's offices reported diversion cases for 273 females (36%), 483 males (64%), and 4 with unknown reported gender (<1%). Among the diversion cases, marijuana and assault were the most common offenses (12%), followed by disorderly conduct/fighting (4%).

Background

In 2015, the Colorado General Assembly passed House Bill 15-1273 (see §24-33.5-503(1)(aa) & (2), C.R.S.; §20-1-113, C.R.S.; and §22-32-146(5), C.R.S.), mandating that local law enforcement agencies annually report specific information regarding law enforcement contact with students to the Division of Criminal Justice (DCJ) in the Department of Public Safety. Agencies must report every incident that resulted in a student's arrest, summons, or ticket during the previous academic year. H.B. 15-1273 mandated DCJ to annually analyze and report the data by law enforcement agency and by school. For information on incidents analyzed by school, school district, and law enforcement agency, please go to the following website to access an interactive data dashboard: dcj.colorado.gov/dcj-offices/ors/dashb-student.

In addition, H.B. 15-1273 mandated that each district attorney office annually reports to DCJ specific information regarding any student who was granted pre- or post-filing juvenile or adult diversion for a ticket, summons, or offense that occurred at a public elementary school, middle or junior high school, or high school; in a school vehicle; or at a school activity or sanctioned event.

DCJ provided data collection instruments for law enforcement agencies and district attorney offices to submit this information for the period between August 1, 2023, and July 31, 2024.

This report is organized as follows: Section One describes the legal statute mandating reporting including the data requested and the approach employed to develop the data set; Section Two focuses on the findings from the data provided by law enforcement agencies; Section Three presents information on the outcome of the incidents according to court records; and, Section Four provides results from district attorney diversion cases and a summary of the findings by judicial district.

Section 1: Data sources and method

Data sources

Law enforcement data. Based on the statutory mandate, each law enforcement agency employee or contractor who acted in an official capacity on school grounds, in a school vehicle, or at a school activity or sanctioned event at public elementary schools, middle or junior high schools, or high schools, is required to report the following:

- a) Student's full name;
- b) Student's date of birth;
- c) Student's race, ethnicity, and gender;
- d) Name of the school where the incident occurred or the name of the school that operated the vehicle or held the activity or event;
- e) Date of the arrest or taking of a student into custody;
- f) Date of the issuance of the summons or ticket;
- g) Arrest or incident report number as recorded by the law enforcement agency;
- h) Single most serious offense for which a student was arrested, issued a summons, or issued a ticket using the National Crime Information Center (NCIC) crime code;
- i) Type of weapon involved, if any, for offenses classified as Group A offenses in the National Incident-Based Reporting System ([NIBRS](#)); and
- j) Law enforcement agency's originating reporting identifier.

For the period between August 1, 2023, and July 31, 2024, 177 law enforcement agencies provided information to DCJ. Of these, 46 agencies reported no-incidents, and 131 agencies reported at least one school incident. The table below summarizes the number of agencies that responded to DCJ's requests for data on school incidents, the number of agencies reporting incidents, and the total incidents reported by academic year.

Table 1.1 Reporting Trends, 2014-15 to 2023-24

Academic Year	Agencies responding to school incident reports	Agencies reporting incidents	Total Incidents
2014-15	92	71	6641
2015-16	147	101	6727
2016-17	140	91	6295
2017-18	165	106	7050
2018-19	128	92	6688
2019-20	131	91	4897
2020-21	132	77	1023
2021-22	125	80	4574
2022-23	124	106	4810

Academic Year	Agencies responding to school incident reports	Agencies reporting incidents	Total Incidents
2023-24	177	131	5057

Approximately 240 law enforcement agencies are expected to report data to DCJ for this project. Since the passage of H.B. 15-1273, DCJ has made significant efforts to inform law enforcement agencies about their reporting requirements and to assist them in submitting their reports. A total of 29 agencies responded, indicating that they either do not have schools in their jurisdictions or that the reports are submitted by other agencies. The reasons why some law enforcement agencies still have not reported data to the DCJ remain unclear. DCJ provides data collection instruments to all law enforcement agencies to capture reports of both incidents and non-incidents.

A note of caution. Given the limitations of law enforcement records management systems, it is likely that agencies reported incidents based on the school's address. This means information may be missing regarding incidents that occurred elsewhere, such as in a school vehicle or at a school-sanctioned event that did not occur on school property. It also means that incidents that involved individuals other than students may be included in the data provided to DCJ.

District attorney data. H.B. 15-1273 mandates that each district attorney's (DA) office annually report to DCJ specific information regarding any student who was granted pre- or post-filing juvenile diversion for a ticket, summons, or offense that occurred at a public elementary school, middle or junior high school, or high school; in a school vehicle; or at a school activity or sanctioned event.

DA's are required to report the following information:

- a) Student's full name;
- b) Student's date of birth;
- c) Student's race, ethnicity, and gender;
- d) Date of the arrest or taking of a student into custody;
- e) Date of the issuance of the summons or ticket;
- f) Arrest or incident report number as recorded by the law enforcement agency; and
- g) Name of the law enforcement agency that issued the ticket/summons or arrest.

This report covers the period between August 1, 2023, and July 31, 2024. It should be noted a substantive change in statute related to Senate Bill 21-066 which struck "pre-filing" from the school discipline reporting requirements. To this end, and effective with the 2021-2022 academic year reporting, district attorney offices included ALL juvenile or adult diversion cases in their data reporting. Twenty-one of the 22 DA offices in Colorado submitted information to DCJ for the 2023-2024 academic year.

Court data from the State Judicial Branch's ICON data system. Efforts were made to locate the disposition of cases filed in county or district court using the Judicial ICON data system. The Judicial data system includes all cases filed in county or district court with the exception of the Denver County Court, which is not part of the ICON system. Additionally, there is no central repository for municipal court information. As a result, cases related to incidents filed in Denver County or a municipal court are not available for analysis. Court records were located for approximately 21% of incidents.

FBI Offense Categorization. To obtain the type of offense associated with the incidents provided, the offenses or crimes reported by the law enforcement agencies were matched with crime codes and categories provided by the Federal Bureau of Investigation’s National Crime Information Center (NCIC). Not all reported incidents included a crime type. When this occurred, the offense type was coded “other.”

Colorado Department of Education. H.B. 15-1273 limits the analysis to public schools. An official list of public schools from the Colorado Department of Education (CDE) website was used to identify and match the school name provided by law enforcement agencies with the official school name, and to obtain the school level (e.g., middle school). Some of the school names provided corresponded to a school facility, a school program, or a private school not listed by CDE as having a school code. These incidents (a total of 65) were excluded from the analysis.

Method

Incident date and name. For an incident to qualify for inclusion in the study, the date of the incident had to fall between August 1, 2023, and July 31, 2024. If the date was outside the study period, the incident was excluded. Incidents that did not include the name of the student (required for matching with court data) were eliminated from the court record analysis but included in the law enforcement contact analysis.

Some agencies reported more than one offense for the same person on the same date, using the same incident number. When this occurred, the most serious offense was selected for analysis.

Contact type. H.B. 15-1273 called for the analysis of school-related incidents that resulted in either an arrest, a summons, or a ticket. Because “summons” and “ticket” are used interchangeably, these two categories were combined. When the contact type was blank or unclear, which occurred for 87 reported incidents, the contact type was changed to “Other.”

Calculation of age. The data collection instrument requested the student’s date of birth (DOB). Using the DOB and the incident date, the person’s age at the time of the incident was calculated. Incidents for which no DOB was available were placed in an “Unknown” category (count = 105). It should be noted that for these 105 incidents, the age of the students was not provided as the case was either expunged or sealed by the Court before the law enforcement agency submitted this annual report.

Age was grouped into the following categories: 10-11 years old, 12-13 years old, 14-15 years old, 16-17 years old, and 18-19 years old. Incidents with students aged 20 and older and 9 or younger were excluded from the analysis (count = 34).

Schools. School information was necessary to identify incidents that occurred on school premises. Incidents for which the school name was not provided, or the name was not on the list of Colorado Department of Education Schools, were eliminated (count = 65). Also, to protect the identity of students involved in the incidents reported here, schools with five or fewer incidents were placed in a category titled “Schools with few incidents.” In total, 298 schools (53%) were re-assigned to this category.

Race/ethnicity. Race and ethnicity are reported using the following categories: White, Hispanic, Black, and Other/unknown. To ensure the privacy of students in this study, when there was a school with only one incident, the race/ethnicity of the student was changed to “other/unknown.”

Matching records. Name, DOB, incident/arrest number, incident or arrest date, and most serious offense from the law enforcement agency data were used to match incidents with court records in the Judicial ICON data system. A similar matching process was undertaken to obtain offense type for the DA diversion cases. Note that ICON does not contain municipal court records or Denver County Court data, so this information was not available for analysis.

Summary

One hundred seventy (177) law enforcement agencies responded to the DCJ request for school incident reports corresponding to the 2023-24 academic year. Of those who responded, 131 law enforcement agencies reported incidents in at least one school in their jurisdiction and 46 agencies reported no incidents in their jurisdiction.

Approximately 240 law enforcement agencies are expected to report data to DCJ for this study. Since the passage of H.B. 15-1273, DCJ has conducted outreach through Colorado’s law enforcement associations to ensure all agencies understand this reporting requirement. The reasons why some law enforcement agencies still did not report data to DCJ are unclear.

Given the limitations of law enforcement records management systems, it is likely that law enforcement agencies reported incidents based on the address of the school. This means information may be missing regarding incidents that occurred elsewhere (e.g. school vehicle or an offsite school-sanctioned event). It also means that incidents that involved individuals other than students may be included in the data provided to DCJ.

A total of 5,057 incidents in 567 public schools were included in the analyses presented here. Court records were found for 1,046 incidents, representing about 21% of the incidents. Since these cases were filed in district or county court (not including Denver County Court), it is likely that these 1,046 incidents represent more serious offenses, cases with multiple charges, or individuals with prior incidents. Twenty-one of the 22 district attorney offices in Colorado submitted information to DCJ.

Section 2: Analysis of law enforcement contacts

One hundred and thirty-one (131) law enforcement agencies reported 5,057 qualifying incidents in 567 public schools during the 2023-24 academic year, from August 1, 2023, through July 31, 2024.

This section provides an analysis of law enforcement reports of incidents. For additional information on incidents analyzed by school and law enforcement agency, please visit the [Criminal Justice Contacts with Students dashboard](https://dcj.colorado.gov/dcj-offices/ors/dashb-student) at dcj.colorado.gov/dcj-offices/ors/dashb-student.

Description of incidents

Table 2.1 shows that 79% of incidents resulted in a summons/ticket, 11% resulted in arrest, and approximately 10% of incidents in an “other or unknown” action. Table 2.2 presents race/ethnicity information for the students involved in reported incidents. White students made up the largest portion at 46%. The remaining incidents included 38% Hispanic/Latino students, 9% African-American/Black students, and 7% where the students’ race was either “other or unknown.”

Table 2.1 Contact type

Contact Type	Count	Percent
Summons/Ticket	4,010	79%
Arrest	492	10%
Other/Unknown	555	11%
Total	5,057	100%

Table 2.2 Student race/ethnicity

Race/Ethnicity	Count	Percent
White	2,341	46%
Hispanic/Latino	1,911	38%
African-American/Black	430	9%
Other/Unknown	375	7%
Total	5,057	100%

Fifty-eight percent (58%) of incidents reported by law enforcement agencies involved male students, 41% involved female students, and for one percent of the students the gender was unknown (data not displayed). Table 2.3 shows the ages of students involved in the incidents. Fourteen and 15-year-olds were more likely than those in the other age categories to be involved in incidents reported here. Four percent (4%) of cases fell into the 10-11 age category and 3% fell into the 18-19 age category. Table 2.4 shows that 5% of the incidents occurred in elementary schools, 26% occurred in middle or junior high schools, 67% occurred in high schools, and 2% occurred in other types of schools.

Table 2.3 Student age category

Age	Count	Percent
10-11	193	4%
12-13	1,138	23%
14-15	2,118	42%
16-17	1,362	27%
18-19	141	3%
Unknown	105	2%
Total	5,057	100%

Table 2.4 School level

School Level	Count	Percent
High	3,372	67%
Middle/Junior High	1311	26%
Elementary	254	5%
Other (*)	120	2%
Total	5,057	100%

(*) Other includes public Charter schools, Innovation schools, Magnet and Option schools, and Online schools.

Table 2.5 shows the type of offenses involved in the incidents reported. The most frequently occurring offense was Marijuana (23%). Additional common incidents reported by law enforcement agencies include assault (21%) and Disorderly Conduct/fighting (17%). When combined with Marijuana, these three offenses represent 61% of all incidents.

Table 2.5 Offense type

Offense	Count	Percent
Marijuana	1,186	23%
Assault	1,038	21%
Disorderly Conduct/Fighting	854	17%
Public Order Crimes	303	6%
Harassment/Harassing communication	204	4%
Tobacco	203	4%
Liquor/Alcohol	160	3%
Weapon Offense	129	3%
Other Drugs/Health or Safety	116	2%
Larceny/Theft	103	2%
Minor in possession	87	2%
Trespassing	82	2%
Traffic Offense	68	1%
Damage Property	66	1%

Offense	Count	Percent
Drug Paraphernalia	62	1%
Aggravated Assault	54	1%
Sexual Assault/Offense	35	1%
Warrant	29	1%
Obscenity	25	<1%

Table 2.6 shows offense type by school level. Assault (24%) and disorderly conduct/fighting (19%) were the most common offenses in elementary schools. Assault (24%) and marijuana (23%) were the most frequently reported offenses in middle or junior high schools. Marijuana (25%) and assault (19%) were the most common offense types in high schools. For the Other types of schools, 29% of contacts reported were disorderly conduct/fighting-related offenses and 25% were marijuana cases.

Given the frequency of assault and disorderly conduct, it is not surprising that law enforcement agencies reported 25% (count=1,265) of total incidents involved a weapon. However, Table 2.7 shows that personal weapons (82%), such as fists or feet, were the most common weapons reported. A firearm (including handgun, shotgun, rifle, and other firearm) was present in more than 5% of incidents involving a weapon (count=69).

Table 2.7 Weapon type

Description of incidents by contact type

Table 2.8 shows female students are more likely to receive a summons/ticket than male students, 84% and 76% respectively. Male students were more likely to get arrested (11% compared to 8% for females). Male and female students had other or unknown contact types with law enforcement in about 12% and 9% of the incidents, respectively. As shown in Table 2.9, all age groups were more likely to receive a summons compared to any other contact type. Students aged 18 to 19 were most likely to be arrested, which occurred in 12% of the incidents.

Table 2.8 Student gender and contact type

Gender	Count	Summons	Arrest	Other/ Unknown	Total

Table 2.10 presents the contact type at different school levels. Eight percent of incidents that occurred in elementary schools and in middle/junior high, 11% in high schools, and 9% in other schools resulted in an arrest. It should be noted that, of the 254 incidents reported in elementary schools, only 64 offenses were committed by youths aged 10 to 11. The remaining 190 incidents involved older students committing offenses on elementary school grounds. Specifically, 95 incidents were committed by students aged 12-13, 63 incidents by those aged 14-15, and 32 incidents by individuals aged 16-19 or whose age is unknown.

Table 2.10 School level and contact type

School Level	Count	Summons	Arrest	Other/ Unknown	Total
Elementary	254	77%	8%	15%	100%

Total	5,057	79%	10%	11%	100%

(*) Other includes public Charter schools, Innovation schools, Magnet and Option schools, and Online schools.

The analysis of incidents based on race/ethnicity and contact type show Hispanic/Latino students were more likely to receive a summons (84%) compared to White (78%), African-American/Black (70%), or other race (74%) students. African-American/Black students were more than twice as likely to be arrested (22%) compared to the overall rate (10%) (Table 2.11).

Table 2.11 Student race/ethnicity and contact type

Race/Ethnicity	Count	Summons	Arrest	Other/ Unknown	Total
White	2,341	78%	7%	16%	100%

Total	5,057	79%	10%	11%	100%

Table 2.12 provides information on offense and contact type. Burglary, menacing, a warrant, or failure to appear contacts were more likely to result in an arrest. Forty-three percent (43%) of weapons-related crimes (note that weapons include fists or feet) resulted in an arrest. Incidents involving obstructing/tampering offenses were linked to an arrest in 39% of cases. Regarding the top three offenses, marijuana, assault, and disorderly conduct/fighting resulted in an arrest in 1%, 22%, and 2% of the incidents, respectively.

(*) Other includes unclear or missing crimes and low occurrences, non-death related offenses.

About twenty-five percent (25%) of incidents involved weapons, according to law enforcement reports. However, 82% of these incidents included personal weapons (such as fists or feet). As shown in Table 2.13, all the incidents involving a rifle resulted in an arrest; 74% of incidents involving handguns; 50% of involving a blunt object; and 37% involving a knife/cutting instrument resulted in an arrest.

Table 2.13 Weapon and contact type

Weapon	Count	Summons	Arrest	Other/ Unknown	Total
Personal Weapons	1,036	73%	22%	5%	100%
Knife/Cutting Instrument	84	51%	37%	12%	100%

Other	56	75%	11%	14%	100%
Total	1,265	69%	25%	6%	100%

Summary. Males are more likely to be arrested compared to females, and those incidents that involved a serious weapon, such as a rifle or handgun, were more likely to result in an arrest. Twenty-two percent of assault cases resulted in an arrest, but only 1% of marijuana and 2% of disorderly conduct-related incidents resulted in an arrest.

Description of incidents by race/ethnicity

Table 2.14 shows the distribution of gender and race/ethnicity for those involved in the 5,057 incidents. Table 2.15 displays the distribution of age within each racial/ethnic group, and Table 2.16 reflects the race/ethnicity distribution within each age category.

Table 2.15 shows that overall, 14-15 is the most common age involved in contacts with law enforcement agencies. African American/Black students tend to be older than other race/ethnicity groups.

Table 2.14 Student gender and race/ethnicity

Table 2.16 shows race/ethnicity by age category. While White students were involved in 46% of incidents overall, 50% of students in the 16-17 age and 53% in the 18-19 age categories were White. While Hispanic/Latino students were involved in 38% of incidents overall, approximately 42% of students in the 12-13. While African-American/Black students were involved in 9% of incidents overall, 10% of students in the 16-17 and 18-19 age categories were Black. It should be noted that for 105 incidents, the age of the students was not provided as the case was either expunged or sealed by the Court before the law enforcement agency submitted this annual report.

Table 2.16 Student age category and race/ethnicity

Total	5,057	46%	38%	9%	7%	100%

Table 2.17 shows school level and race/ethnicity. Hispanics were more likely to be involved in middle school incidents compared to the overall race/ethnicity distribution. Incidents in high schools accounted for the majority across all racial/ethnic categories, particularly for African American/Black students (78%).

Table 2.17 School level and race/ethnicity of students

Table 2.18 depicts the offense type and race/ethnicity of the student and displays the distribution of the race and ethnicity of students for each offense committed. Overall, 46% of incidents involved White students, 38% involved Hispanic/Latinos, 9% involved African-American/Blacks, and 7% involved students of other or unknown race/ethnicity. Of the marijuana offenses, 51% involved White, 37% involved Hispanic/Latino, and 6% involved African-American/Black students. Hispanic/Latino students were charged with 53% of disorderly conduct/fighting offenses and 47% of weapon offenses. African-American/Black students were charged in 23% of failure to appear offenses, 20% of interference with educational institutions, and 16% of assault cases.

Table 2.19 shows the offense type by the race/ethnicity of students, which is the reverse of Table 2.18. and displays the type of offense committed by each race/ethnicity student. White (26%) students were most frequently involved in marijuana-related offenses. Hispanic/Latino students were most frequently charged with disorderly conduct (24%). African-American/Black students and Other/Unknown race students were most frequently involved in assault (respectively 39% and 25%).

Table 2.20 shows incidents involving a weapon and race/ethnicity of students. Note that weapons were involved in 25% (count = 1,265) of incidents, however, as previously discussed, this figure includes 1,036 instances when the weapon was a fist or feet (personal weapon). Eighty-five percent (85%) of African American/Black and 83% of Other/Unknown race involved in an incident with a weapon used personal weapons. Five percent (5%) of incidents for African American/Black and students of Other/Unknown race where a weapon was involved a handgun compared to 3% overall.

Table 2.20 Weapon type and race/ethnicity

Other	7%	4%	2%	4%	4%
Total	100%	100%	100%	100%	100%

Overall Summary. Most incidents (67%) occurred in high schools, and of those only 10% of incidents resulted in an arrest versus a summons/ticket (79%). Arrests were more likely to occur for more serious offenses such as burglary and menacing, as well as for warrants and failure to appear. Forty-three percent of weapons-related crime (note that weapons may include fists or feet) resulted in an arrest. Obstructing/tampering offenses resulted in an arrest in 39% of cases. White students were involved in 46% of incidents overall and were most likely to be charged with marijuana-related offenses (26%) and assault (15%). Hispanic/Latino students, involved in 38% of incidents overall were most likely to be charged with disorderly conduct (24%) and marijuana (23%). African-American/Black students, involved in 9% of incidents overall, were most likely to be charged with assault (39%) and disorderly conduct or marijuana (16%).

Description of incidents by judicial district

Table 2.21 shows the distribution of incidents by judicial district. The 1st (16%), 17th (16%), 18th (21%), and 4th and 19th (9%) Judicial Districts accounted for the largest percent of incidents. The lack of availability of Denver County Court (2nd Judicial District) records results in a smaller number of incidents matched to court cases in Denver. In all other Judicial Districts both county and district court records are available in the ICON database.

Table 2.21 Judicial districts and number of incidents

Judicial District	Count	Percent

Total	5,057	100%

Table 2.22 provides information about whether the incident involved a summons/ticket or an arrest, by judicial district. Incidents in certain judicial districts, such as the 1st, 2nd, 3rd (*note the 3rd judicial district only had 4 reported incidents*), 18th, 19th, 20th, and 21st had higher likelihood of arrest compared to the overall arrest proportion for all districts (10%). The 14th and 16th judicial districts reported no arrests. As discussed previously, arrests were more likely to occur when more serious offenses were involved or on a warrant.

Table 2.22 Judicial districts and contact type

Table 2.23 provides information on the race/ethnicity of students involved in incidents and the judicial district where the school is located. This information should be considered in the context of the race/ethnicity distribution of students in these judicial districts See Appendix D, Table D.2, for this information.

* JD - Judicial District

Summary. Approximately 71% of the incidents reported by law enforcement agencies occurred in the 1st, 4th, 17th, 18th, and 19th judicial districts. Incidents in certain judicial districts had higher arrest rates compared to the overall arrest rate for all districts (10%); however, the number of incidents in some of these locations is small. As discussed previously, arrests were more likely to occur when more serious offenses were involved.

Section 3: Analysis of court records

District and county court records were matched with incidents using the State Judicial ICON data system by using student name, date of birth, arrest/incident number, and arrest, incident or offense date. Of the 5,057 incidents analyzed, court records were found for 1,046 incidents, or approximately 21% of incidents. However, Denver County Court and all municipal court records are not contained in ICON, so this information is not available for analysis. Lower-level offenses are more likely referred to municipal courts but there is no central repository for municipal court data in Colorado. Since 1,046 cases were filed in district or county courts, it is likely that these incidents represent more serious offenses, or individuals with prior incidents.

Table 3.1 shows that 30% of incidents that resulted in an identified court filing resulted in a conviction, 43% were dismissed or found not guilty, and 27% of the cases had not yet been resolved by November 2024 when the case matching analysis occurred.

Table 3.1 Case outcome

Outcome	Count	Percent
Convicted	312	30%
Dismissed/Not Guilty	450	43%
No Finding - Case not yet resolved	284	27%
Total	1,046	100%

Note: Case outcome information was obtained using the Judicial ICON data system that holds district and county (excluding Denver County) court data.

Table 3.2 shows the case outcome by type of offense and Table 3.3 shows the percentage of cases that were convicted at disposition. For offenses with more than 20 incidents, higher conviction rates were found for weapon offenses (67%) and assault (41%), followed by aggravated assault (30%.)

Table 3.2 Offense type and case outcome (frequency)

(*) Other includes unclear or missing crimes and low occurrences, non-death related offenses.

Table 3.4 displays the contact type and court case outcome. Of those who received a summons, 22% were convicted, 59% were dismissed/not guilty, and 19% had not reached a disposition. Of those arrested, 50% were convicted, 20% were dismissed/not guilty, and 20% had not reached a disposition.

Table 3.4 Contact type and conviction rate

Case Outcome	Summons	Arrest	Other/ Unknown	Total
Count	644	208	194	1,046
Convicted	22%	50%	34%	30%
Dismissed/Not Guilty	59%	20%	15%	43%
No Finding - Case not yet resolved	19%	30%	51%	27%
Total	100%	100%	100%	100%

Note: Case outcome information was obtained using the Judicial ICON data system that holds district and county (excluding Denver County) court data. The percent convicted is based only on cases that have reached disposition.

Of the court case outcomes (count = 1046), 701 cases involved male students (67%). Among these cases, 22% resulted in convictions, 27% were dismissed, and 17% remained unresolved. In comparison, 345 cases identified in the court case outcomes involved female students (33%). Of these, 7% were convicted, 15% had their cases dismissed, and 10% remained unresolved. (Data not displayed).

Table 3.5 displays the court case outcome by student race/ethnicity for those incidents that were identified with district or county court records. Hispanic/Latino (31%) and White students (30%) were convicted in similar proportions compared to the other race/ethnicity groups--African American/Black students (26%) and Other/Unknown (28%). Charges were dismissed more frequently for White students (48%) compared to the other race/ethnicity groups. African American/Black students and students of Other/Unknown race had higher rates of unresolved cases (41% and 38%, respectively), compared to White and Hispanic/Latino youth (22% and 30%, respectively).

Table 3.5 Case outcome and race/ethnicity of students

Case Outcome	White	Hispanic/ Latino	African- American/ Black	Other/ Unknown	Total
Count	585	287	80	94	1,046
Convicted	30%	31%	26%	28%	30%
Dismissed/Not Guilty	48%	39%	32%	34%	43%
No Finding - Case not yet resolved	22%	30%	41%	38%	27%
Total	100%	100%	100%	100%	100%

Note: Case outcome information was obtained using the Judicial ICON data system that holds district and county (excluding Denver County) court data.

Of the 312 cases that were convicted, 296 cases had a sentence recorded at the time the data were obtained for analysis. Table 3.6 shows the most serious sentence for each offense. Over half (52%) of the 296 incidents received a sentence to probation/deferred judgment, 26% received a sentence to diversion, 9% received fines/fees, and 7% were on unsupervised probation/deferred judgment. The remaining 16 youths were sentenced to juvenile detention (count = 7), the Division of Youth Services (DYS) (count = 4), community service (count = 3), the Department of Correction (DOC) (count = 1), or jail (count = 1).

Table 3.6 Most serious sentence imposed

Sentence	Count	Percent
Probation/Deferred	154	52%
Diversion	78	26%
Fines/fees	27	9%
Unsupervised Probation/Deferred	21	7%
Juvenile Detention	7	2%
Division of Youth Services	4	1%
Community Service	3	1%

Sentence	Count	Percent
DOC	1	<1%
Jail	1	<1%
Total	296	100%

Note: Case outcome information was obtained using the Judicial ICON data system that holds district and county (excluding Denver County) court data.

Table 3.7 shows sentence and type of offense. The number of cases in each category is shown rather than percentages because many of the small numbers would round to 0% and thus provide limited information. According to the data presented in Table 3.7, assault and weapon offense were more likely to result in a probation/deferred judgment sentence while incidents involving marijuana were more likely to receive a diversion sentence.

Section 3: Analysis of court records

Table 3.7 Offense type and sentence

Section 3: Analysis of court records

Note: Case outcome information was obtained using the Judicial ICON data system that holds district and county (excluding Denver County) court data.

Table 3.8 displays the original contact type and most serious sentence. Most cases received a sentence of probation supervision (52%). For cases where the student was arrested, 81% were sentenced to probation/deferred judgment and 8% received a diversion sentence. When a youth was issued a summons, cases received more varied sentences with 35% sentenced to probation/deferred judgment, 28% to diversion, 21% to fines/fees, and 13% to unsupervised probation.

Table 3.8 Case sentence and contact type

Sentence	Summons	Arrest	Other/ Unknown	Total
Count	130	100	66	296
Probation/Deferred	35%	81%	42%	52%

Total	100%	100%	100%	100%

Note: Case outcome information was obtained using the Judicial ICON data system that holds district and county (excluding Denver County) court data.

Table 3.9 displays the most serious sentence with student race/ethnicity for those cases that were identified with district or county court records. African-American/Black students (65%), Hispanic/Latino (58%), and students in the Other/Unknown race category (62%) had higher proportions of probation/deferred sentences. In cases with youth who are White, or race was Other/Unknown, 29% received a sentence to diversion. Diversion sentences were given to 27% of the Hispanic/Latino youth sentenced. There were no cases of African American/Black students receiving diversion.

Table 3.9 Case sentence and race/ethnicity of student

Sentence	White	Hispanic/ Latino	African- American/ Black	Other/ Unknown	Total
Count	169	83	20	24	296

Total	100%	100%	100%	100%	100%

Note: Case outcome information was obtained using the Judicial ICON data system that holds district and county (excluding Denver County) court data.

Summary. Court case information was found for a subset of 1,046 incidents (nearly 21% of the total number of incidents analyzed) that were filed in county (excluding Denver) or district court. Of these 1,046 cases, 296 had a sentence recorded in the Judicial data system.

Most often, cases were dismissed/not guilty (43%) or convicted (30%). For 27% of cases there was not yet a finding posted in the judicial data at the time the data were extracted in November 2024.

Of the 312 convicted cases, 296 cases had a sentence recorded at the time the data were obtained for this analysis. Of those cases, 52% received probation/deferred judgment, 26% were sentenced to diversion, 9% received fines/fees, and 7% received unsupervised probation/deferred judgment. Sixteen youths were sentenced to juvenile detention, the Division of Youth Services, Community Services, the Department of Corrections, or jail.

Section 4: Analysis of diversion cases provided by district attorney offices

Background. House Bill 15-1273 requires district attorney (DA) offices to annually report to the Division of Criminal Justice (DCJ) specific information about any student who was granted pre- or post-filing juvenile or adult diversion for a ticket, summons, or arrest that occurred at a public school, in a school vehicle, or at a school sanctioned event. The data required include the student's full name, date of birth (DOB), race/ethnicity, gender, and the arrest or incident number. DCJ provided a data collection instrument for DA officials to use to submit this information.

Diversion programs give juveniles the opportunity to avoid criminal conviction. Pre-filing diversion programs means that no charges are filed in court. If the individual successfully completes the program, there will be no record of the offense in the court system. Not all DA offices operate a juvenile diversion program. For those that do, agency officials decide which cases are appropriate for diversion. In post-filing diversion, the juvenile is offered an informal adjustment or deferred adjudication, after admission of guilt and agreement to comply with court conditions.

DA offices provided data to DCJ regarding cases that were diverted during the 2023-24 academic year. Researchers matched these cases to the incident data submitted by law enforcement agencies for the same period to find the original offense type.

Matches between data sets used name, date of birth (DOB), and a combination of incident number, arrest number or arrest date. Matches were not found for all cases. This could be due to differences in the spelling of names or differences in recorded DOBs. The lack of a match may also be due to differences in the interpretation of what constituted a school-based incident or the inability to identify a school-based incident with precision.

Description of diversion cases

Twenty-one of the 22 DA offices in Colorado reported 760 qualifying diversion cases. The offices with the most diversion cases reported were from the 1st (75 cases), 4th (105 cases), 8th (59 cases), 18th (152 cases) and 21st (113 cases) Judicial Districts.

Among diversion cases, 7% were African American/Black, 28% were Hispanic/Latino, 58% were White, and the remaining 7% of students the race/ethnicity was Other/Unknown (Table 4.1). It should be noted that because of the small number of youths in some diversion programs, distribution of race and ethnicity should be interpreted with caution.

Table 4.1 Judicial district diversion cases and student race/ethnicity

(*) Judicial District

Table 4.2 shows the ages of the students who participated in diversion programs. Nearly nine of ten diverted youth were between the ages of 12 and 17. Youth 14 to 15 made up the largest proportion of diversion cases (39%) followed by 16 to 17 (25%), and 12 to 13 (23%). Around 6% of youth 10-11 and those of unknown age were diverted. Only one youth 18 to 19 years of age received diversion.

(*) Judicial District

Overall, nearly 64% of diversion cases were male, 36% were female, and under 1% of unknown gender, although this varied considerably by judicial district (Table 4.3).

Table 4.3 Judicial district diversion cases and gender of student

Total	760	36%	64%	<1%	100%

Table 4.4 shows the type of offenses for the students who were granted diversion. Among these 760 cases, marijuana and assault were the most common charge (12%), followed by disorderly conduct (4%). More detailed information by judicial district regarding the crime type associated with diversion cases (when the information was available) may be found in Appendix A.

Table 4.4 Diversion offense type

Crime	Count	Percent
Marijuana	92	12%
Assault	88	12%
Disorderly Conduct/Fighting	30	4%
Harassment	18	2%
Weapon Offense	10	1%
Aggravated Assault	7	1%
Criminal Mischief/Property Damage	7	1%
Other (*)	508	67%
Total	760	100%

(*) Other includes unclear or missing crimes and low occurrences, non-death related offenses.

Summary. During the 2023-24 academic year, twenty-one district attorney offices submitted information to DCJ, reporting a total of 760 qualifying diversion cases. Among these cases, 36% involved females and 64% involved males. Some cases with missing or unclear details regarding crimes, as well as non-death related offenses, were categorized in an Other category. It is important to note that a significant number of diversion cases encompassed a diverse range of offenses. African-American/Black students represented 7% of the group, while 28% were Hispanic/Latino, and 58% were White. For the remaining 7%, race/ethnicity was “other/unknown.” The most common offense types for the 760 cases that were granted diversion were marijuana and assault.

Appendix D

Colorado Judicial Districts and School Populations

2023-24 Academic Year

Colorado is divided into 22 judicial districts, each of which is comprised of between 1 and 7 counties. These 22 judicial districts and their respective counties are listed in Table D.1

Table D.1 Judicial districts and constituting counties

Judicial District	Counties (in alphabetical order)	Number of Counties
1	Gilpin, Jefferson	2
2	Denver	1
3	Huerfano, Las Animas	2
4	El Paso, Teller	2
5	Clear Creek, Eagle, Lake, Summit	4
6	Archuleta, La Plata, San Juan	3
7	Delta, Gunnison, Hinsdale, Montrose, Ouray, San Miguel	6
8	Jackson, Larimer	2
9	Garfield, Pitkin, Rio Blanco	3
10	Pueblo	1
11	Chaffee, Custer, Fremont, Park	4
12	Alamosa, Conejos, Costilla, Mineral, Rio Grande, Saguache	6
13	Kit Carson, Logan, Morgan, Phillips, Sedgwick, Washington, Yuma	7
14	Grand, Moffat, Routt	3
15	Baca, Cheyenne, Kiowa, Prowers	4
16	Bent, Crowley, Otero	3
17	Adams, Broomfield	2
18	Arapahoe, Douglas, Elbert, Lincoln	4
19	Weld	1
20	Boulder	1
21	Mesa	1
22	Dolores, Montezuma	2

Appendix E

Crimes of Diversion Cases by Judicial District

2023-24 Academic Year

Information by DA office. The following Tables E.1 - E.22 list the offense type for pre-file diversion cases reported by District Attorney (DA) offices. Note that DA offices do not provide offense information. Rather, this was obtained by matching the diversion cases reported by DAs with the reports provided by law enforcement. This series of tables provides the frequency of offense types for the cases for which a match was found between the DA record and a law enforcement record. A review of the following tables reflects considerable variation in information available by crime type across the judicial districts.

Table E.1 Offense type for cases reported by the DA office of the 1st Judicial District

Crime	Count	Percent
Assault	12	16%
Disorderly Conduct/Fighting	7	9%
Harassment	5	7%
Marijuana	5	7%
Aggravated Assault	4	5%
Weapon Offense	2	3%
Burglary	2	3%
Arson	1	1%
Criminal Mischief	1	1%
Damage Property	1	1%
Dangerous Drug	1	1%
Interference with Educational Institution	1	1%
Property Crime	1	1%
Other (*)	32	44%
Total	75	100%

(*) Other includes unclear or missing crimes and low occurrences, non-death related offenses

Table E.2 Offense type for cases reported by the DA office of the 2nd Judicial District

Crime	Count	Percent
Burglary	2	13%
Assault	1	7%
Marijuana	1	7%
Warrant	1	7%
Weapon Offense	1	7%
Other (*)	9	59%
Total	15	100%

(*) Other includes unclear or missing crimes and low occurrences, non-death related offenses

Table E.3 Offense type for cases reported by DA office of the 3rd Judicial District

Crime	Count	Percent
Marijuana	2	50%
Other (*)	2	50%
Total	4	100%

(*) Other includes unclear or missing crimes and low occurrences, non-death related offenses

Table E.4 Offense type for cases reported by the DA office of the 4th Judicial District

Crime	Count	Percent
Assault	9	9%
Public Peace	7	7%
Disorderly Conduct/Fighting	6	6%
Harassment	3	3%
Weapon Offense	3	3%
Criminal Mischief	1	<1%
Minor in Possession	1	<1%
Sexual Assault/Offense	1	<1%
Other (*)	74	70%
Total	105	100%

(*) Other includes unclear or missing crimes and low occurrences, non-death related offenses

Table E.5 Offense type for cases reported by the DA office of the 5th Judicial District

Crime	Count	Percent
Assault	4	15%
Other (*)	22	85%
Total	26	100%

(*) Other includes unclear or missing crimes and low occurrences, non-death related offenses

Table E.6 Offense type for cases reported by the DA office of the 6th Judicial District

Crime	Count	Percent
Other (*)	3	100%
Total	3	100%

(*) Other includes unclear or missing crimes and low occurrences, non-death related offenses

Table E.7 Offense type for cases reported by the DA office of the 7th Judicial District

Crime	Count	Percent
Marijuana	6	19%
Family/Child Offense	2	6%
Assault	1	3%
Disorderly Conduct/Fighting	1	3%
Harassment	1	3%
Obscenity	1	3%
Larceny/Theft	1	3%
Liquor/Alcohol	1	3%
Other (*)	17	55%
Total	31	100%

(*) Other includes unclear or missing crimes and low occurrences, non-death related offenses

Table E.8 Offense type for cases reported by the DA office of the 8th Judicial District

Crime	Count	Percent
Assault	6	10%
Harassment	2	3%
Marijuana	2	3%
Traffic Offense	2	3%
Kidnapping	1	2%
Larceny/Theft	1	2%
Other (*)	45	76%
Total	59	100%

(*) Other includes unclear or missing crimes and low occurrences, non-death related offenses

Table E.9 Offense type for cases reported by the DA office of the 9th Judicial District

Crime	Count	Percent
Damage Property	1	6%
Drugs/Health or Safety	1	6%
Harassment	1	6%
Obscenity	1	6%
Assault	1	6%
Other (*)	12	70%
Total	17	100%

(*) Other includes unclear or missing crimes and low occurrences, non-death related offenses

Table E.10 Offense type for cases reported by the DA office of the 10th Judicial District

Crime	Count	Percent
Marijuana	10	36%
Motor Vehicle Theft	2	7%
Menacing	1	3%
Other (*)	15	54%
Total	28	100%

(*) Other includes unclear or missing crimes and low occurrences, non-death related offenses

Table E.11 Offense type for cases reported by the DA office of the 11th Judicial District

Crime	Count	Percent
Other (*)	15	100%
Total	15	100%

(*) Other includes unclear or missing crimes and low occurrences, non-death related offenses

Table E.12 Offense type for cases reported by the DA office of the 12th Judicial District

No report was submitted for this academic year.

Table E.13 Offense type for cases reported by the DA office of the 13th Judicial District

Crime	Count	Percent
Other (*)	3	100%
Total	3	100%

(*) Other includes unclear or missing crimes and low occurrences, non-death related offenses

Table E.14 Offense type for cases reported by the DA office of the 14th Judicial District

Crime	Count	Percent
Assault	1	7%
Dangerous Drugs	1	7%
Other (*)	13	86%
Total	14	100%

(*) Other includes unclear or missing crimes and low occurrences, non-death related offenses

Table E.15 Offense type for cases reported by the DA office of the 15th Judicial District

Crime	Count	Percent
Other (*)	5	100%
Total	5	100%

(*) Other includes unclear or missing crimes and low occurrences, non-death related offenses

Table E.16 Offense type for cases reported by the DA office of the 16th Judicial District

Crime	Count	Percent
Assault	1	12%
Other (*)	7	88%
Total	8	100%

(*) Other includes unclear or missing crimes and low occurrences, non-death related offenses

Table E.17 Offense type for cases reported by the DA office of the 17th Judicial District

Crime	Count	Percent
Assault	2	9%
Harassment	2	9%
Aggravated Assault	1	4%
Dangerous Drug	1	4%
Family/Child Offense	1	4%
Weapon Offense	1	4%
Other (*)	15	65%
Total	23	100%

(*) Other includes unclear or missing crimes and low occurrences, non-death related offenses

Table E.18 Offense type for cases reported by the DA office of the 18th Judicial District

Crime	Count	Percent
Marijuana	55	36%
Assault	22	14%
Disorderly Conduct/Fighting	10	7%
Dangerous Drugs	3	2%
Harassment	3	2%
Larceny/Theft	3	2%
Damage Property	2	1%
Public Order Crimes	2	1%
Sexual Assault/Offense	2	1%
Weapon Offense	2	1%
