*Statistics for unsupervised cases are currently unavailable in Mesa. However, some other Colorado jurisdictions have both researched this, finding better outcomes in the supervised groups. Colorado's CISPR study group, which formed the CPAT assessment, included both supervised and unsupervised cases for the duration of the pretrial period. Mesa's group includes outcomes for supervision periods as defined by the state statute's supervision periods. Therefore, Colorado and Mesa's outcomes should not be directly correlated with each other.*
