Description

Representatives from probation, community corrections, DOC, and local jails must work together to develop and implement a protocol whereby a standardized, comprehensive profile of an offender, the offense, and the victim impact--which may include the PSIR--and individual empirically-based assessment information (such as the Level of Supervision Inventory, and specialized assessments), should follow all individuals convicted of a felony throughout the system, from pre-sentence to release. This assessment should be regularly updated, at a minimum prior to significant decision points in custody or during community supervision, to assure that program placement is linked to criminogenic needs and to document treatment progress and new skills obtained. A systematic quality assurance procedure must be implemented with this initiative. Protocols to share this information while protecting the privacy of the individual must be developed and implemented within and across agencies.

Agencies Responsible

State Judicial, Department of Corrections, the Department of Public Safety, the Governor's Office of Information Technology, local jails

Discussion

This complex recommendation reflects fundamental reform, and has not been implemented. The Commission is committed to the transfer of information that would form the foundation of individualized, dynamic case plan. This complex reform initiative furthers the Commission's statutory mandate to "focus on evidence-based recidivism reduction initiatives...." and ensure the "...cost effective use of public resources." [C.R.S. 16-11.3-103(1)].
