DATA SOURCES

A list of potential data sources is provided on page 5 of the SVPASI for use by the SOMB-listed evaluator or trained DOC staff or contractor when completing the relationship criteria portion of the assessment screening instrument. It is important that all data sources that apply be clearly identified and documented when requested on the instrument. The form will become a part of the court record and officials may be asked to testify on the sources of the information used to classify the offender. Self-report should be used only when other data sources are not available, though it may be the only available source for this instrument.

RELATIONSHIP CATEGORIES

The relationship categories are identified, but not defined, in state statute. The following definitions were provided by the Colorado Supreme Court in 2013 cases to assist in the identification of sexually violent predators as outlined in 18-3-414.5(1)(a) (III), C.R.S. These Colorado Supreme Court decisions found that the Sex Offender Management Board (SOMB) does not have the authority to define the relationship criteria. **Therefore, final determination of relationship criteria rests with the sentencing court or the parole board.**

The SOMB notes that the relationship criteria section of the SVP assessment screening instrument, although required by the statute, **is not based on research and may not be correlated with recidivism.** However, the SOMB recognizes that the offender's relationship to the victim can have a significant impact on the level of trauma to the victim.

If the offender refuses to participate in the assessment, other collateral sources of information, such as victim statements or police reports, should be utilized to determine the relationship criteria. Refer to the manual for further information and examples.

Identify which of the following, if any, relationship category applies.

A. STRANGER

The stranger relationship criterion "is satisfied where either the victim is not known by the offender or the offender is not known by the victim, at the time of the offense." When the trial court assesses whether or not the stranger criterion is met, "it should consider the context of the parties' relationship at the time of the offense." *People v. Hunter*, 307 P.3d 1083, 1086, 2013 CO 48, ¶10.

Meets the **STRANGER** Criterion: Yes No

B. ESTABLISHED RELATIONSHIP

An offender "establishes a relationship" with his/her victim primarily for the purpose of sexual victimization where he/she creates, starts, or begins a relationship primarily for that purpose. *People v. Gallegos*, 307 P.3d 1096, 1101, 2013 CO 45, ¶19.

Meets the **ESTABLISHED RELATIONSHIP** Criterion: Yes No

C. PROMOTED A RELATIONSHIP

An offender "promotes a relationship" if, "excluding the offender's behavior during the commission of the sexual assault that led to his conviction, he otherwise encouraged a person with whom he had a limited relationship to enter into a broader relationship primarily for the purpose of sexual victimization." *People v. Gallegos*, 307 P.3d 1096, 1100, 2013 CO 45, ¶14.

Meets the **PROMOTED A RELATIONSHIP** Criterion: Yes No

D. NONE OF THE ABOVE

Check "NONE," if none of the above Relationship Criteria have been met: NONE

3B. SOMB SEX OFFENDER RISK SCALE (SORS) 2018

Pursuant to 16-11.7-103(4)(d), C.R.S., the Division of Criminal Justice worked in consultation with the Sex Offender Management Board (SOMB) to develop an actuarial risk assessment scale to be used in the identification of a person's risk for recidivism. Recidivism was measured as a new court filing for a violent or sexual offense within 8 years. **A score of 22 or above, automatically calculated below, reflects that the individual falls into a risk category with a 50-60% likelihood of a new sex or violent crime court filing within 8 years. Note: Less than 5% of individuals assessed for SVP eligibility will score 22 or higher.**

The SORS formula is:

Score = (#Adult Cases x 2.1) + (# Juvenile Cases x 3.1) + (# Cases with a revocation x 2.2) – (Earliest Sex Offense Filing Age x .23)

This research is described in the [SVPASI Handbook \(Section Two\)](#).

Note that risk of recidivism for a new sexual or violent offense remains unknown for women and persons with developmental disabilities because the research sample used to develop this instrument included too few of these individuals. Caution should be exercised in the use of this instrument with these populations. For more information, please see the [SOMB White Paper: Female Sex Offender Risk Assessment](#) at <https://drive.google.com/file/d/0ByCqXGmcaW-aam1XTmliQnpudIU> and the SOMB Standards: Appendix L and Standards 2.150 DD/ID, 2.170 DD/ID, 2.200 DD/ID, 4.500 (I), 4.510 (I), and 4.600 (K).

Please fill in the information below and press the **Calculate** button. If you make a change press **Calculate** to update the score.

Total number of adult cases filed

(Include District and County cases in Colorado or another state with sex or non-sex misdemeanor or felony charges, regardless of conviction, excluding this case. Include cases in which age at offense was 18 or older, or less than 18 and filed as an adult.)

(Include only Juvenile Delinquency cases in Colorado or another state with sex or non-sex misdemeanor or felony charges, regardless of conviction, excluding this case.)

Total number of cases containing a revocation from probation or community corrections

One of the following instruments must be completed by the evaluator, who must meet the minimum qualifications for administering the instrumentation utilized to make the following determination.
