INTRODUCTION TO THIS HANDBOOK

The General Assembly requires that special precautions should be taken in the community management of sexually violent predators. Pursuant to 16-11.7-103(4)(d) and 18-3-414.5, C.R.S., the Colorado Division of Criminal Justice's Office of Research and Statistics worked in consultation with representatives of the Colorado Sex Offender Management Board (SOMB) to develop a risk assessment screening instrument for use in the identification of individuals who meet the eligibility criteria for designation by the court or parole board as *sexually violent predators (SVPs)*.

The Sexually Violent Predator Assessment Screening Instrument (SVPASI) identifies those individuals most likely to commit a subsequent sexual or violent offense.

The final legal determination of sexually violent predator is at the discretion of the court and/or the parole board.

BACKGROUND

In the mid-1990s, federal law mandated that each state develop a mechanism to identify "sexually violent predators." The federal legislation identified the offender's behavior present in the current crime and his/her risk of committing future similar crimes as primary criteria for the states to use in the designation of sexually violent predators (SVPs). The Colorado General Assembly complied with the federal SVP mandate during its 1998 session by enacting 18-3-414.5, C.R.S. The statutes relevant to this Handbook and the SVPASI can be found in APPENDIX A.

An adult convicted of at least one of the following offenses and found to be a sexually violent predator is required for the remainder of his or her natural life to register his or her residential address with local law enforcement every three months rather than annually. Information describing the offender is placed on the Internet listing of sex offenders maintained by the Colorado Bureau of Investigations (CBI) and linked to the State of Colorado's homepage. Further, the offender is subject to community notification by the local law enforcement agency. The offenses specified in 18-3-414.5(1)(a)(II)(A through E), C.R.S., describe sexual assault "as it existed prior to July 1, 2000." The qualifying crimes, which *include* attempt, solicitation, and conspiracy to commit one of the following, are as follows:

- Sexual assault, in violation of section 18-3-402, C.R.S., or sexual assault in the first degree, in violation of section 18-3-402, C.R.S. as it existed prior to July 1, 2000;
- Sexual assault in the second degree, in violation of section 18-3-403, C.R.S. as it existed prior to July 1, 2000 (*Note: Section 18-3-403 was repealed in 2000*);
- Unlawful sexual contact, in violation of section 18-3-404(1.5) or (2), C.R.S., or sexual assault in the third degree, in violation of section 18-3-404(1.5) or (2),
- C.R.S. as it existed prior to July 1, 2000;
- Sexual assault on a child, in violation of sections 18-3-405, C.R.S.; or
- Sexual assault on a child by one in a position of trust, in violation of section 18-3-405.3, C.R.S.

The offender must be convicted of one of the above on or after July 1, 1999 for offenses committed on or after July 1, 1997. *Note that state law requires the assessment and designation process on active cases only.*

The history of prior versions of the SVPASI may be found in earlier SVPASI Handbooks.

HOW TO USE THIS HANDBOOK

Probation officers, SOMB approved evaluators, and trained DOC staff or contractors will complete the assessment instrument on men and women who qualify for screening as described in this Handbook.

SECTION ONE provides instructions for completing the Sexually Violent Predator Assessment Screening Instrument.

SECTION TWO provides a description of the research study and findings that resulted in the development of Part 3B of the SVPASI, the SOMB Sex Offender Risk Scale (SORS).

SECTION ONE: COMPLETING THE SEXUALLY VIOLENT PREDATOR ASSESSMENT SCREENING INSTRUMENT (SVPASI)

OVERVIEW

Only probation officers, SOMB-approved evaluators and SVP-trained DOC staff or contractors are qualified to complete the Sexually Violent Predator Assessment Screening Instrument.

The completion of the Sexually Violent Predator Assessment Screening Instrument (SVPASI) for qualifying cases is mandated in 18-3-414.5, C.R.S. The qualifying crime categories are listed below. The law requires the assessment and designation process on active cases only, not cases in which the sentence has been previously discharged.

The offender must have been convicted on or after July 1, 1999 of one of the following offenses committed on or after July 1, 1997. *Attempt, solicitation, or conspiracy to commit one of the following crimes are also considered to be qualifying offenses.* Conviction is defined to include verdicts of guilty, pleas of guilty and nolo contendere, or having received a deferred judgment and sentence. Individuals must be 18 years or older on the date of the offense or be tried as an adult.

- Sexual assault, in violation of section 18-3-402, C.R.S., or sexual assault in the first degree, in violation of section 18-3-402, C.R.S. as it existed prior to July 1, 2000;
- Sexual assault in the second degree, in violation of section 18-3-403, C.R.S., as it existed prior to July 1, 2000 (*Note: Section 18-3-403 was repealed in 2000*);
- Unlawful sexual contact, in violation of section 18-3-404(1.5) or (2), C.R.S., or sexual assault in the third degree, in violation of section 18-3-404(1.5) or (2), C.R.S., as it existed prior to July 1, 2000;
- Sexual assault on a child, in violation of section 18-3-405, C.R.S.; or
- Sexual assault on a child by one in a position of trust, in violation of section 18-3-405.3, C.R.S.

The **probation officer** is responsible for completing certain portions of the instrument and forwarding it to the SOMB-listed sex offender evaluator for completion. The evaluator then returns the completed form to the probation officer. In cases in which the offender has refused to cooperate with the assessment, the probation officer may complete the form in its entirety. The probation officer ensures that each item is entered on the form. The probation officer forwards the original instrument to the sentencing judge who makes the final Sexually Violent Predator (SVP) determination and, when making a finding, enters the SVP order in the record.

For the **Department of Corrections** cases, trained DOC staff or contractors are responsible for completing the entire instrument. The trained staff member or contractor makes sure that each item is completed and entered into the Department of Corrections Information System (DCIS). A copy of the instrument is then submitted to the parole board. The parole board makes the final Sexually Violent Predator (SVP) determination and enters the SVP order in the record.

2023 SVPASI HANDBOOK

Following these instructions is required by state statute. The DCJ and the SOMB must ensure that the statute is implemented as the General Assembly intended, according to 18-3-414.5, C.R.S. An individual found to be a sexually violent predator by the court or the parole board is required to register every quarter his or her residential address with law enforcement pursuant to 16-22-108(1)(d), C.R.S., and is subject to community notification by the local law enforcement agency.

Specifically, sexually violent predator status requires the individual to register with local law enforcement every ninety days for the rest of his or her natural life (see 16-22-108(1)(d), C.R.S.). The individual must register in the jurisdiction where they live within five business days of becoming a temporary or permanent resident. The offender must re-register if they legally change their name. Upon changing residences, the offender must re-register accordingly to ensure that the address documentation is correct. Failure to comply with these requirements is a felony crime (per 18-3-412.5, C.R.S.).

A copy of the SVPASI Handbook and Instrument Form can be obtained from the Sex Offender Management Board (SOMB) or downloaded from <https://ors.colorado.gov/ors-SORA>. The SVPASI is provided in portable document format (pdf) with fillable fields.

INSTRUCTIONS

(See page 3 of the instrument)

Overview

- This instrument may require information from both the pre-sentence investigation writer and an SOMB-listed sex offender evaluator. Once complete, the instrument must be forwarded to the court.
- For Department of Corrections cases, a trained DOC staff member or contractor must complete the instrument and forward it to the parole board when the person is considered for release.
- As described above, a copy of the SVPASI Handbook and Instrument can be obtained from the Sex Offender Management Board (SOMB) or downloaded from <https://ors.colorado.gov/ors-SORA>.

Probation Officers

Probation officers are to complete the following:

- **Part 1** (page 4), **Part 3A** (page 6), and **Part 3B** (page 6)
- Corresponding items on the **Instrument Summary** (page 8)
- The **Assessment Summary** (page 1)

If the offender refuses to cooperate, the probation officer may also complete Part 2 (page 5)

When these sections are completed, probation officers shall forward the instrument and copies of any police reports and victim statements to the SOMB approved evaluator (unless the offender has refused to cooperate and the entire form has been completed by the probation officer).

In the event no Pre-Sentence Investigation Report or Offense Specific Evaluation is ordered, and part 3C is needed to determine the criteria, the probation officer should refer the offender to an SOMB Approved Evaluator (unless the offender has refused to cooperate and then NA can be marked)

SOMB Evaluators

The SOMB approved evaluator is selected by the probation officer pursuant to the SOMB's *Standards*. The evaluator is required to complete the following:

- **Part 2** (page 5) and **Part 3C** (page 7)
- Corresponding items on the **Instrument Summary** (page 8), including:
 - Whether the evaluator agrees with the instrument findings (page 8), and
 - Confirmation that the evaluator has reviewed all sections (page 8).

Upon completion of the instrument, the evaluator will return it to the probation officer with the mental health sex offense specific evaluation. Both the evaluation and the sexually violent predator assessment instrument will be attached to the PSIR. **When necessary, the evaluator may expand the data obtained during the evaluation to acquire the information necessary to complete the SVPASI.**

Trained DOC Staff or Contractors

The trained Colorado Department of Corrections (DOC) staff or contractor must complete the entire instrument:

- **Part 1** (page 4), **Part 2** (page 5), **Part 3A** (Page 6), **Part 3B** (page 6), **Part 3C** (page 7)
- Corresponding items on the **Instrument Summary** (page 8)
- The **Assessment Summary** (page 1).

Data Sources

A list of potential data sources is provided on page 5 of the SVPASI for use by the SOMB-listed evaluator or trained DOC staff or contractor when completing the relationship criteria portion of the assessment screening instrument. It is important that all data sources that apply be clearly identified and documented when requested on the instrument. The form will become a part of the court record and officials may be asked to testify on the sources of the information used to classify the offender. Self-report should be used only when other data sources are not available, though it may be the only available source for this instrument.

Defining Sexual Assault Crimes (Eligible Cases for Screening)

Probation officers, SOMB-listed sex offender evaluators, trained DOC staff, or trained DOC contractors will complete the entire instrument for every sex offender that meets the following criteria:

- Is 18 years of age or older on the date of the offense, or has been tried as an adult pursuant to 19-2.5-801 or 19-2.5-802, C.R.S., and
- Has been convicted (including verdicts of guilty, pleas of guilty and nolo contendere, or receiving a deferred judgment and sentence) on or after July 1, 1999 for an offense committed on or after July 1, 1997, including an attempt, solicitation or conspiracy to commit, for one of the following:
 - Sexual assault, in violation of 18-3-402, C.R.S., or sexual assault in the first degree, in violation of 18-3-402, C.R.S. as it existed prior to July 1, 2000;
 - Sexual assault in the second degree, in violation of 18-3-403, C.R.S., as it existed prior to July 1, 2000 (*Note: 18-3-403 was repealed in 2000*);
 - Unlawful sexual contact, in violation of 18-3-404(1.5) or (2), C.R.S., or sexual assault in the third degree, in violation of 18-3-404(1.5) or (2), C.R.S., as it existed prior to July 1, 2000;
 - Sexual assault on a child, in violation of 18-3-405, C.R.S.; or
 - Sexual assault on a child by one in a position of trust, in violation of section 18-3-405.3, C.R.S.

Check the box indicating which of the listed crimes qualifies the person for the assessment.

Finally, mark Yes/No to identify whether the individual meets the defining crimes criterion.

Proceed to Part 2.

PART 2

(See Page 5 of the instrument)

This entire section is to be completed by the SOMB evaluator or trained DOC staff or contractor, unless the offender refuses to participate in the assessment. In this case, this section shall be completed by the probation officer using collateral sources of information.

Relationship Categories

The relationship categories are identified, but not defined, in state statute. The following definitions were provided by the Colorado Supreme Court in cases in 2013 to assist in the identification of sexually violent predators, as outlined in 18-3-414.5 (1)(a)(III), C.R.S.¹

The evaluator is being asked to identify whether the offender meets one of the relationship criteria or not, **but the final determination rests with the sentencing court or the parole board.**

The SOMB notes that the relationship criteria section of the SVP Assessment Screening Instrument, although required by the statute, is not based on research and is not related to the statistical probability of risk for re-arrest for a new sexual offense. However, the SOMB recognizes that the offender's relationship to the victim can have a significant impact on the level of trauma to the victim.

Identify Category

Mark “Yes”, if any, of the following criteria applies:

- A. **STRANGER.** The stranger relationship criterion “is satisfied where either the victim is not known by the offender or the offender is not known by the victim, at the time of the offense.” When the trial court assesses whether or not the stranger criterion is met, “it should consider the context of the parties’ relationship at the time of the offense.” *People v. Hunter*, 307 P.3d 1083, 1086, 2013 CO 48, ¶10.
- B. **ESTABLISHED RELATIONSHIP.** An offender “establishes a relationship” with his victim primarily for the purpose of sexual victimization where he creates, starts, or begins a relationship primarily for that purpose. *People v. Gallegos*, 307 P.3d 1096, 1101, 2013 CO 45, ¶19.²
- C. **PROMOTED RELATIONSHIP.** An offender “promotes a relationship” if, “excluding the offender’s behavior during the commission of the sexual assault that led to his conviction, he otherwise encouraged a person with whom he had a limited relationship to enter into a broader relationship primarily for the purpose of sexual victimization.” *People v. Gallegos*, 307 P.3d 1096, 1100, 2013 CO 45, ¶14.
- D. **NONE OF THE ABOVE.** Please mark NONE to indicate that the individual does NOT meet any of the Relationship Criteria.

¹ The CO Supreme Court cases referenced in this Handbook: Part 2 can be found at (*People v. Hunter*; courts.state.co.us/userfiles/file/Court_Probation/Supreme_Court/Opinions/2010/10SC146.pdf) and at (*People v. Gallegos*; courts.state.co.us/userfiles/file/Court_Probation/Supreme_Court/Opinions/2009/09SC1084.pdf). These CO Supreme Court cases can also be found using the Harvard Law School: Caselaw Access Project (specifically for these cases) at cite.case.law/p3d/307.

² In *People v. Gallegos*, the Colorado Supreme Court stated that “established a relationship” and “promoted a relationship” were alternative ways that the relationship criterion could be met. To meet the “established” criterion, a prior relationship between the offender and the victim need not exist. To meet the “promoted” criterion, a relationship between the victim and the offender will already exist.

Data Source(s)

Select the One(s) Used to Determine Relationship Criteria

Regardless of the relationship criterion identified, at least one data source must be documented. The SOMB evaluator, the probation officer, or the trained DOC staff or contractor must check the appropriate box in the section at the bottom of page 5 of the instrument to indicate the data source(s) utilized to make this recommendation. The potential data sources include:

1. *Criminal History*
2. *Pre-Sentence Investigation Process*
3. *Police Report*
4. *Mental Health Evaluation*
5. *Official Record/Documentation*
6. *Child Protection or Social Service Records*
7. *Demographic Information*
8. *NCIC*
9. *Education Records*
10. *Victim Report (self-report or from any data source)*
11. *Sexual History (official record, self-report)*
12. *Sex Offense Specific Mental Health Evaluation*
13. *Prison Record*
14. *Self-Report*
15. *CCIC*
16. *Results of a Plethysmograph Examination or VRT Assessment*
17. *Other (Specify)_____*

If a source other than those listed was utilized, check item 17 and specify the data source.

Proceed to Part 3.

(See Page 6 of the instrument)

If the defendant has previously been convicted as an adult of at least one felony or two misdemeanor sex crimes as defined by 16-11.7-102(3), C.R.S., check “Yes.” Otherwise, check “No.”

Note: This excludes deferred judgments, failure to register, and juvenile adjudications.

The qualifying crimes (including any attempt, solicitation, and conspiracy to commit), include [listed in statute order, paragraphs (3) (a) to (aa)]:

- Sexual assault, in violation of section 18-3-402, C.R.S. or sexual assault in the first degree, in violation of section 18-3-402, C.R.S., as it existed prior to July 1, 2000;
- Sexual assault in the second degree, in violation of section 18-3-403, C.R.S., as it existed prior to July 1, 2000;
- Unlawful sexual contact, in violation of section 18-3-404, C.R.S. or sexual assault in the third degree, in violation of section 18-3-404, C.R.S., as it existed prior to July 1, 2000;
- Sexual assault on a child, in violation of section 18-3-405, C.R.S.;
- Sexual assault on a child by one in a position of trust, in violation of section 18-3-405.3, C.R.S.;
- Sexual assault on a client by a psychotherapist, in violation of section 18-3-405.5, C.R.S.;
- Enticement of a child, in violation of section 18-3-305, C.R.S.;
- Incest, in violation of section 18-6-301, C.R.S.;
- Aggravated incest, in violation of section 18-6-302, C.R.S.;
- Human trafficking of a minor for sexual servitude, as described in section 18-3-504 (2), C.R.S.;
- Sexual exploitation of a child, in violation of section 18-6-403, C.R.S.;
- Procurement of a child for sexual exploitation, in violation of section 18-6-404, C.R.S.;

- Indecent exposure, in violation of section 18-7-302, C.R.S.;
- Soliciting for child prostitution, in violation of section 18-7-402, C.R.S.;
- Pandering of a child, in violation of section 18-7-403, C.R.S.;
- Procurement of a child, in violation of section 18-7-403.5, C.R.S.;
- Keeping a place of child prostitution, in violation of section 18-7-404, C.R.S.;
- Pimping of a child, in violation of section 18-7-405, C.R.S.;
- Inducement of child prostitution, in violation of section 18-7-405.5, C.R.S.;
- Patronizing a prostituted child, in violation of section 18-7-406, C.R.S.;
- Class 4 felony of Internet luring of a child, in violation of section 18-3-306 (3), C.R.S.;
- Internet sexual exploitation of a child, in violation of section 18-3-405.4, C.R.S.;
- Public indecency, committed in violation of section 18-7-301 (2)(b), if a second offense is committed within five years of the previous offense or a third or subsequent offense is committed;
- Invasion of privacy for sexual gratification, as described in section 18-3-405.6;
- Unlawful electronic sexual communication, in violation of section 18-3-418; or
- Unlawful sexual conduct by a peace officer, in violation of section 18-3-405.7.

“Convicted” is defined as a verdict or plea of guilty or nolo contendere. Court established factual basis sex crimes and out of state sex crime convictions are included in the definition of conviction. Again, deferred judgments and sentences, failure to register and juvenile adjudications are EXCLUDED.

The criteria for defining a prior conviction follows the case law identified in 18-1.3-801, C.R.S. To qualify, the date of the offense for which the offender is being assessed must have occurred after a conviction for one of the sexual crimes defined above. The prior conviction must be based upon charges separately brought and tried, and arising out of separate and distinct criminal episodes, either in this state or elsewhere.

Therefore, convictions related to the current/index offense, such as situations in which multiple cases result from a singular offense, are excluded. For example: if in the case of the current/index offense an offender assaulted a victim in two different counties, which resulted in convictions in both counties, both convictions would be related to a singular offense and would not be considered a prior conviction.

Single cases with multiple conviction charges are considered a single conviction. For example, if an offender had two victims within a single jurisdiction and was prosecuted for two counts of sexual assault in a single case, this would be a single conviction (though with multiple counts). If this was the situation in the current/index offense, this would not count as a prior conviction.

For further clarification regarding the definition of prior conviction, refer to 18-1.3-801, C.R.S.

If this Part 3A item answer is, “Yes,” and the individual meets one of the relationship criteria defined in Part 2 of the SVPASI, the offender qualifies for designation as an SVP. Please proceed to the Instrument Summary on page 8. Complete the Instrument Summary, except for the portion requiring the evaluator’s responses, and complete the Assessment Summary on page 1.

**If the individual scores “YES” to PART 3A, proceed to INSTRUMENT SUMMARY;
Otherwise, proceed to PART 3B.**

3B. SOMB Sex Offender Risk Scale (SORS) 2018

(See Page 6 of the instrument)

The SOMB Sex Offender Risk Scale (SORS) was developed pursuant to 16-11.7-103(4)(d), C.R.S., which requires the Sex Offender Management Board to collaborate with the Division of Criminal Justice to develop a risk assessment screening instrument to identify a person's risk for recidivism.

The SORS actuarial risk assessment instrument determines the probability that specific groups of individuals will commit a new offense. That is, actuarial risk assessment places individuals into groups that have a known probability for reoffending. Those who meet the SORS scoring criteria fall into a risk group that has a 50-60% likelihood of a new sex or violent court filing within eight years of a conviction/deferred judgement for one of the qualifying SVP offenses. The SORS was developed using the data elements available in the Judicial Branch's ICON data system.

The SORS automatically calculates the score after the probation officer enters the necessary information and presses the "Calculate" button. The automatic calculation is intended to reduce the time and errors associated with completing the instrument, and it allows for a more complicated scoring system which increases the predictive accuracy of the SORS. The formula for the actuarial scale is as follows:

Score = (# Adult Cases x 2.1) + (# Juvenile Cases x 3.1) + (# Revocation Cases x 2.2) – (Earliest Sex Offense Filing Age x .23)

SORS Items

For the items below, only include cases that have been verified through criminal history system checks.

Total number of adult cases filed:

Include district and county cases (including Denver County) filed in Colorado or another state in which the age at offense was 18 or older, or less than 18 and filed as an adult. Include cases with any misdemeanor or felony charge, including traffic, regardless of conviction, excluding this case. Please enter this number into the form field.

Total number of juvenile cases filed:

Include only *Juvenile Delinquency* cases filed in Colorado or another state, with a misdemeanor or felony charge, regardless of conviction, excluding this case. Exclude cases filed in county court. Please enter this number into the form field.

Total number of cases containing a revocation from probation or community corrections:

Include district, county (including Denver County) and juvenile delinquency cases in Colorado with misdemeanor or felony charges (including traffic cases). Include cases in which probation or community corrections was reinstated. If a case had multiple revocations only count it once. *Do not include parole revocations.* Please enter this number into the form field.

Earliest sex offense filing age:

This input refers to the age at filing date. If filing date is not available, use age at date of offense. Include district, county, and juvenile delinquency cases filed in Colorado or another state with a sex offense charge, regardless of conviction, including this case. Please refer to Part 3A of this Handbook for a list of qualifying sex crimes. Round age to the nearest full year. Please enter the age into the form field.

SORS Scoring

While the instrument was developed using only Colorado court cases, probation officers often have access to out-of-state information about criminal proceedings. To better understand the impact of out-of-state information on SVP-eligibility (that is, scoring 22 or above on the SORS), a subsample of 300 cases was examined by hand to determine the impact of adding out-of-state case filings to the information required by the SORS. Not surprisingly, the additional information increased the likelihood of some individuals scoring 22 or more on the SORS. However, even with this additional information, it is estimated that fewer than five percent of those assessed with the SORS will score 22 or more.

SORS Notes

Regarding women and individuals with developmental disabilities. Note that risk of recidivism (new sex or violent crime filing) remains unknown for women and persons with developmental disabilities because the study cohort used to develop this instrument included too few of these individuals. Caution should be exercised in the use of this instrument with these populations. Evaluators using this instrument with women and persons with developmental disabilities shall also attach documentation with an explanation of the scoring, limitations of the assessment, any relevant research, and a recommendation on whether the person should be identified as a Sexually Violent Predator.

If “Meets SORS criteria” is “Yes,” proceed to the Instrument Summary.

If does not meet SORS criteria (“No”), proceed to 3C.

3C. Psychopathy or Personality Disorder

(See Page 7 of the instrument)

SOMB evaluator or trained DOC staff or contractor must complete at least one of the following three assessment instruments UNLESS the offender refuses to participate in the assessment:

***The Hare Psychopathy Check List Revised (PCL-R),
The Millon Clinical Multiaxial Inventory (MCMI-IV) or
The Coolidge Correctional Inventory (CCI)***

The evaluator or the trained DOC staff must meet the minimum qualifications to administer the instrumentation as determined by the author of the instrument.

Pursuant to 16-11.7-103(4)(d), C.R.S., the assessment "...shall consider as one element of the risk posed by an adult sex offender who suffers from psychopathy or a personality disorder...."

- Prior to administering the Hare PCL-R, a clinician is required to attend a training with Dr. Hare or his appointee. A certificate is provided after the training. The use of the PCL-R is not allowed without this formal training, per the requirements of the instrument.
- Users of the MCMI-IV must have completed graduate-level courses in tests/measurements or have received equivalent documented training.
- The CCI should be used only on incarcerated populations with the same stipulations outlined above for the MCMI-IV.

A description of each of these instruments is available in **APPENDIX B**.

Psychopathy or Personality Disorder Criteria

Check the appropriate box (Yes / No) indicating that the offender meets the psychopathy or personality disorder criterion or **"N/A"** if the specified instrument was not used. The criteria are met when an individual scores as follows:

- 30 or more on the Hare Psychopathy Check List Revised (PCL-R), **OR**
- 85 or more on each of the following Millon Clinical Multiaxial Inventory (MCMI-IV)³ scales – narcissistic, antisocial, and paranoid, **OR**
- 70 or more on each of the following Coolidge Correctional Inventory (CCI)⁴ scales – narcissistic, antisocial, and paranoid.

³ The MCMI-IV (Millon Clinical Multiaxial Inventory-IV) is a 195-item self-administered questionnaire that generates 26 subscales and assesses for 15 personality disorders and 10 clinical syndromes in adult patients.

⁴ The CCI (Coolidge Correctional Inventory) is a 250 item self-report psychological inventory that measures Axis I clinical syndromes and Axis II personality disorders as well as neuropsychological symptoms such as memory problems, inattention, language dysfunction, neurosomatic problems, neuropsychological syndromes, adult ADHD, and executive function deficits of the frontal lobes. This instrument is used within DOC only.

Meets Psychopathy or Personality Disorder Criteria

If the offender did meet one of the criteria defined above, check “Yes” in the box provided.

If not, check “No.”

If the individual refused to participate, check “Refused testing.”

If the offender is assessed with more than one of the specified instruments and a ‘Yes’ is indicated in any of the boxes, the offender qualifies for the Sexually Violent Predator designation.

Proceed to the Instrument Summary.

INSTRUMENT SUMMARY

(See Page 8 of the instrument)

After the probation officer, the SOMB evaluator, or the trained DOC staff or contractor completes Parts 1, 2, 3A, 3B, and/or 3C, the findings must be summarized in the Instrument Summary.

Please check either the “Yes” or “No” box displayed after the statements:

SECTION TWO

2018 SORS Study Description

Actuarial Risk

Statistical predictions of behavior sort individuals into subgroups which have the behavior of interest occurring at different rates, such as more vs. fewer traffic accidents, or in the case of the SORS, new sex or violent offenses. *Individual behavior* is not being predicted. Rather, statistical risk tools predict an individual's *membership in a subgroup* that is correlated with future offending. Actuarial risk prediction is determining the probability that specific groups of individuals will commit a new offense. That is, actuarial risk assessment places individuals into groups that have a known probability for reoffending. Those who meet the SORS scoring criteria fall into a risk group that has a 50-60% likelihood of a new sex or violent court filing within eight years of a conviction/deferred judgement for one of the qualifying SVP offenses.

SORS Overview

The SOMB Sex Offender Risk Scale (SORS) described here was developed pursuant to C.R.S. 16-11.7-103(4)(d) which requires the Division of Criminal Justice to work in consultation with the Sex Offender Management Board to develop an actuarial risk assessment scale to be used in the identification of a person's risk for recidivism.

The SORS was developed using the data elements available in the Judicial Branch's ICON data system plus data from Denver County Court. Using data elements from ICON has advantages and disadvantages. The significant advantages include the ability to analyze a large number of cases, and the information is readily available to probation officers who complete the SVPASI. The disadvantage is the limited information that is available in ICON. Specifically, information about current and past criminal charges is available in ICON, but rich details that might be gleaned during an interview, for example, is not available for analysis. Fortunately, juvenile/criminal history data are typically strong predictors of future criminality.

The new SORS is a fillable form, and requires the use of Adobe Reader. The SORS automatically calculates the score after the probation officer enters the necessary information and presses the calculate button. The automatic calculation is intended to reduce the time and errors associated with completing the instrument, and it allows for a more complicated scoring system which increases the predictive accuracy of the SORS.

The SOMB decided that only those most likely to recidivate would meet the SORS criterion. For this reason, a score of 22 or above on the SORS is required for individuals to meet this criterion. Less than five percent of individuals assessed on the SORS will score 22 or higher.

Study Design

The study cohort consisted of 4,698 adults who had a conviction or deferred judgment for an SVP-eligible crime (see C.R.S. 18-3-414.5) in Colorado between 1999 and 2008, and who had eight years of "at-risk" time in the community. Individuals who received prison sentences were included in the study cohort as long as, subtracting out incarceration time, the person had eight years "at-risk." This cohort was selected both to maximize the follow-up period and ensure a large sample size. Excluded from the cohort were those individuals with one prior adult felony sex offense conviction or two misdemeanor

sex offense convictions because these individuals will qualify for SVP eligibility as they will score “Yes” on Part 3A.

The sample was 97% male, 74% White, and 7% Black. Hispanics represented 16% of the sample, however, Judicial does not collect ethnicity information so most Hispanics all fall into the White race category. Criminal history and age information were obtained for each person in the study cohort, using the data available in ICON plus Denver County Court. The dozens of variables initially examined included the number of past/present cases, types of charges and conviction offenses, the dates of the cases, and date of birth. Because criminal history variables are highly correlated, cluster analysis was used to identify groups of similar variables. All possible combinations of each variable from each group was statistically modeled using logistic regression, a technique used in the development of predictive equations.

The study cohort was randomly divided into two groups for analysis: the development sample, with two-thirds of the group, and the validation sample, with one-third of the group. The prediction model was constructed on the larger group and validated on the smaller group.

Recidivism was defined as a new court filing for a sex or violent offense within eight years of the original SVP-eligible conviction/deferred judgment. Recidivism crimes included homicide, kidnapping, robbery, felony assault, sex assaults, and other sex crimes (including, for example, indecent exposure). Using this measure, 10% of the study cohort had a new sex/violent offense filing in Colorado (4% had a new sex offense filing) during the eight-year observation period. New filing data were obtained from the Colorado Judicial Branch ICON (plus Denver County) information system. Both the development sample and the validation sample had identical proportions of recidivating cases (10%).

Predictive Model

Logistic regression is a statistical method for analyzing a dataset in which there are multiple variables that predict a specific outcome. The goal of logistic regression is to find the best fitting model to describe the relationship between the dichotomous outcome (new filing/no new filing) and a set of independent (predictor or explanatory) variables. Logistic regression generates the coefficients (and its standard errors and significance levels) of a formula to predict a *logit transformation* of the odds of the presence of the characteristic of interest. Dozens of prediction models were generated in the process of determining the one that had the best fit, that is, had the highest predictive accuracy. The following factors were found to predict new sex or violent filing within eight years:

- Total number of prior adult court cases filed regardless of conviction, misdemeanor or felony (excluding current),
- Total number of juvenile court cases filed regardless of conviction, misdemeanor or felony (excluding current),
- Total number of cases with a revocation from probation or community corrections (not parole⁵), and
- Age at first sex offense filing, regardless of conviction, including this case.

⁵ Parole data is not housed in the Judicial ICON information management system and therefore was not available for this study.

Table 1. Final logistic regression model selected

PREDICTIVE FACTORS	Estimate	Std. Error	z value	Pr(> z)	z value
Adult Cases	0.2072	0.02595	7.981	1.447e-15	* * *
Juvenile Cases	0.3125	0.05166	6.049	1.453e-09	* * *
Revocation Cases	0.2251	0.1082	2.081	0.03746	*
Earliest Sex Filing Age	-0.02339	0.006293	-3.717	0.0002019	* * *
(Intercept)	-2.008	0.2049	-9.799	1.135e-22	* * *
	McFadden	Adj.McFadden	Cox.Snell	Nagelkerke	
PSEUDO R ²	0.1213	0.1153	0.07594	0.1587	

To translate the logistic regression results into an actuarial scale, the coefficients were multiplied by 10 and rounded, and the intercept was removed, creating a simple scoring system from the information presented in Table 1.

The formula for the actuarial scale is as follows: Score = (# Adult Cases x 2.1) + (# Juvenile Cases x 3.1) + (# Revocation Cases x 2.2) – (Earliest Sex Offense Filing Age x .23)

Note that the historical case information is additive, meaning that the first three factors are added together. The last factor, the individual's age at first sex crime filing, is subtracted from the total.

Once the predictor variables and their accompanying weights were identified, the next step was determining the cut points for the scale. The scores were grouped into five bins using Fisher-Jenks⁶ Natural Breaks. The scores in the highest bin were selected by the SOMB as the cut-point for the SVP designation. In the development data set, this cut-point contained 1.4% of the population and had a recidivism rate of 59.5%. In the validation data set this cut-point contained 1.2% of the population and had a recidivism rate of 52.6%. Specifically, a score of 22 or above means that the person falls into a risk group with a 53% - 60% chance of recidivating with a new sex or violent offense filed in court within eight years of receiving a deferred judgment/conviction for an SVP-eligible crime.

Predictive Accuracy

Predicting rarely occurring events, such as a court filing for a sex or violent crime, is extremely challenging. When the base rate - the rate of the event of interest - is as low as 10%, one will be correct 90% of the time predicting no recidivism. This scale identifies a small group with the highest likelihood of recidivism.

One method of assessing accuracy is quantified by the Area Under the ROC (Receiver Operating Characteristic) Curve (AUC). The power of the model's predicted values to discriminate between recidivists and non-recidivists is expressed by the AUC. The AUC is a figure that varies from 0.5 (discriminating power not better than chance) to 1.0 (perfect discriminating power).

PCL-R	2645	10	0.66	0.54–0.68

Note. *n*=sample size; *k*=number of samples; AUC=area under the curve; IQR=interquartile range.

The four-item model achieved an AUC of .75 for both the development and validation samples. This can be interpreted to say that there is a 75% chance that a randomly selected recidivist would have a higher score than a randomly selected non-recidivist.⁸ This compares favorably with the AUC of other common risk assessment tools, as reflected in Table 2. Also, by way of comparison, McGrath, Hoke and Lasher (2013) report an AUC of .74 (sex) and .71 (violence) for the VASOR-2.⁹

Scoring the Instrument

While the instrument was developed using only Colorado court cases, probation officers often have access to out-of-state information about criminal proceedings. To better understand the impact of out-of-state information on SVP-eligibility (that is, scoring 22 or above on the SORS), a subsample of 300 cases was examined to determine the impact of adding out-of-state case filings to the information required by the SORS. Not surprisingly, the additional information increased the likelihood of some individuals scoring 22 or higher on the SORS. However, even with this additional information, it is estimated that fewer than five percent of those assessed with the SORS will score 22 or more.

Limitations of Actuarial Prediction

In 1978, the American Psychological Association (APA) withdrew its support of members who testified to the dangerousness of individual offenders based on clinical prediction. The APA's position was based on a number of studies that revealed the error rate of clinical prediction was intolerably high. Studies of clinical prediction indicated that experts were wrong in their predictions of dangerousness, on average, two out of three times.¹⁰ While actuarial (statistical) prediction is not a perfect solution to the prediction of dangerousness, the approximate error rate of group predictions is known. Policy decisions about the cost of errors - over predicting and under predicting dangerousness - can be made in light of known probabilities.

However, the science of risk prediction is imperfect. Prediction variables are limited to the data available and to items that have a practical or theoretical link. The research literature is quite clear that criminal history, lifestyle, social adjustment and opportunity are relevant and statistically powerful indicators of risk. However, actuarial methods are limited because offenders in any study group may vary on factors not measured.

Additionally, prediction tools may lose efficiency over time and generalizability of prediction tools across jurisdictions is suspect. As stated by Farrington and Tarling, “If a prediction instrument is to be used in criminal justice decisionmaking, it is essential that the sample from which it is derived is drawn from the population on which it is to be used. (Farrington and Tarling, 1985¹¹). Developing the scale on sex offenders convicted of crimes in Colorado and subject to the SOMB standards of assessment, evaluation, treatment and monitoring is, in fact, the ideal research design, despite the general limitations of actuarial risk assessment discussed here.

- (b) A petition may be transferred from the juvenile court to the district court only after a hearing as provided in this section.
 - (c) If the crime alleged to have been committed is a felony defined by section 18-8-208, and no other crime is alleged to have been committed and the juvenile has been adjudicated a juvenile delinquent for a delinquent act that constitutes a class 4 or 5 felony, then the charge for the crime may not be filed directly in the district court, but the juvenile court may transfer the charge to the district court pursuant to subsection (1)(a) of this section.
 - (d)
 - (I) If a juvenile is convicted in cases in which criminal charges are transferred to the district court pursuant to this section, the district court judge shall sentence the juvenile either:

 - (II) The district court judge may sentence a juvenile pursuant to this article 2.5 if the juvenile is convicted of a lesser included or non-enumerated felony offense in cases in which criminal charges are transferred to the district court pursuant to this section. If the juvenile is convicted of only a misdemeanor offense or misdemeanor offenses, the court shall adjudicate the juvenile a delinquent and sentence the juvenile pursuant to this article 2.5.
 - (III) If a juvenile is convicted of an offense that is not eligible for district court jurisdiction pursuant to either this section or section 19-2.5-801, the juvenile shall be remanded to juvenile court for sentencing pursuant to this article 2.5.

 - (e) Whenever a juvenile under the age of fourteen years is sentenced pursuant to section 18-1.3-401 as provided in subsection (1)(d) of this section, the department of corrections shall contract with the department of human services to house and provide services to the juvenile in a facility operated by the department of human services until the juvenile reaches the age of fourteen years. On reaching the age of fourteen years, the juvenile must be transferred to an appropriate facility operated by the department of corrections for the completion of the juvenile's sentence.
- (2) After filing charges in the juvenile court but prior to the time that the juvenile court conducts a transfer hearing, the district attorney may file the same or different charges against the juvenile by

direct filing of an information in the district court or by indictment pursuant to section 19-2.5-801. Upon the filing or indictment in the district court, the juvenile court no longer has jurisdiction over proceedings concerning the charges.

(3) At the transfer hearing, the court shall consider:

- (a) Whether there is probable cause to believe that the juvenile has committed a delinquent act for which waiver of juvenile court jurisdiction over the juvenile and transfer to the district court may be sought pursuant to subsection (1) of this section; and
- (b) Whether the interests of the juvenile or of the community would be better served by the juvenile court's waiving its jurisdiction over the juvenile and transferring jurisdiction over the juvenile to the district court.

(4)

- (a) The hearing must be conducted as set forth in section 19-1-106, and the court shall make certain that the juvenile and the juvenile's parents, guardian, or legal custodian have been fully informed of their right to be represented by counsel.
- (b) In considering whether to waive juvenile court jurisdiction over the juvenile, the juvenile court shall consider the following factors:
 - (I) The seriousness of the offense and whether the protection of the community requires isolation of the juvenile beyond that afforded by juvenile facilities;
 - (II) Whether the alleged offense was committed in an aggressive, violent, premeditated, or willful manner;
 - (III) Whether the alleged offense was against persons or property, greater weight being given to offenses against persons;
 - (IV) The juvenile's maturity, as determined by considerations of the juvenile's home, environment, emotional attitude, and pattern of living;
 - (V) The juvenile's record and previous history;
 - (VI) The likelihood of the juvenile's rehabilitation by use of facilities available to the juvenile court;
 - (VII) The interest of the community in the imposition of a punishment commensurate with the gravity of the offense;
 - (VIII) The impact of the offense on the victim;
 - (IX) Whether the juvenile was twice previously adjudicated a delinquent juvenile for delinquent acts that constitute felonies;
 - (X) Whether the juvenile was previously adjudicated a juvenile delinquent for a delinquent act that constitutes a crime of violence, as defined in section 18-1.3-406;
 - (XI) Whether the juvenile was previously committed to the department of human services following an adjudication for a delinquent act that constitutes a felony;
 - (XII) Whether the juvenile is sixteen years of age or older at the time of the offense and the present act constitutes a crime of violence, as defined in section 18-1.3-406;
 - (XIII) Whether the juvenile is sixteen years of age or older at the time of the offense and has been twice previously adjudicated a juvenile delinquent for delinquent acts against property that constitute felonies; and
 - (XIV) Whether the juvenile used, or possessed and threatened the use of, a deadly weapon in the commission of a delinquent act.
- (c) The amount of weight to be given to each of the factors listed in subsection (4)(b) of this section is discretionary with the court; except that a record of two or more previously sustained petitions for delinquent acts that constitute felonies or a record of two or more juvenile probation revocations based on acts that constitute felonies establish prima facie evidence that to retain jurisdiction in juvenile court would be contrary to the best interests of the juvenile or

- of the community.
- (d) The insufficiency of evidence pertaining to any one or more of the factors listed in subsection (4)(b) of this section is not in and of itself determinative of the issue of waiver of juvenile court jurisdiction.
 - (5) Written reports and other materials relating to the juvenile's mental, physical, educational, and social history may be considered by the court, but the court, if so requested by the juvenile, the juvenile's parent or guardian, or other interested party, shall require the person or agency preparing the report and other material to appear and be subject to both direct and cross-examination.
 - (6)
 - (a) If the court finds that its jurisdiction over a juvenile should be waived, it shall enter an order to that effect; except that such order of waiver is null and void if the district attorney fails to file an information in the criminal division of the district court within five days after issuance of the written order of waiver, exclusive of Saturdays, Sundays, and court holidays. Upon failure of the district attorney to file an information within five days of the issuance of the written order of waiver, exclusive of Saturdays, Sundays, and court holidays, the juvenile court shall retain jurisdiction and shall proceed pursuant to this article 2.5.
 - (b) As a condition of the waiver of jurisdiction, the court in its discretion may provide that a juvenile shall continue to be held in custody pending the filing of an information in the criminal division of the district court. Where the juvenile has made bond in proceedings in the juvenile court, the bond may be continued and made returnable in and transmitted to the district court, where it must continue in full force and effect unless modified by order of the district court.
 - (7) If the court finds that it is in the best interests of the juvenile and of the public for the court to retain jurisdiction, it shall proceed with the adjudicatory trial pursuant to part 9 of this article 2.5.

APPENDIX B

Regarding Psychopathy or Personality Disorder

The HARE Psychopathy Check List (Revised-PCL-R or Screening Version-PCL-SV), a 20 item inventory of personality traits, has been found to be predictive of violent behavior among groups who have previously behaved aggressively (see Monahan and Steadman, 1994). Factor One measures personality characteristics such as selfishness and narcissism. It taps the psychological dimension of an individual. Factor Two measures behavior such as criminal history, and it reflects the extent to which a person is engaged in an antisocial lifestyle. Both factors have been found to be associated with negative outcomes.

The Millon Clinical Multiaxial Inventory (MCMI-IV) calculates 26 personality subtypes. Factor analyses were conducted to determine if any of the subtypes “clustered” within the study sample, but this analysis proved unproductive. Twelve subtypes were identified as adding useful information about the sample: Schizoid, Narcissistic, Anti-Social, Sadistic, Negativistic, Schizotypal, Paranoid, Alcohol Abusive, Drug Abusive, Post-Traumatic Stress Disorder, Thought Disorder, and Delusional Disorder.¹⁴

The Coolidge Correctional Inventory (CCI) is a 250 item, self-report, psychological inventory. It was created (a) to be a cost-effective measure of psychological problems, (b) to be a *DSM-IV-TR* aligned measure of Axis I clinical syndromes and Axis II personality disorders, (c) to measure neuropsychological symptoms such as memory problems, inattention, language dysfunction, and neurosomatic problems, and neuropsychological syndromes such as neurocognitive disorder, adult ADHD, and executive function deficits of the frontal lobes, and (d) to allow the differential diagnosis of those inmates who have clinically diagnosable syndromes from those who do not. The median scale reliability (Cronbach’s alpha) for the 14 personality disorder scales measured by the CCI was .75. The median scale reliability for five Axis I scales was .85, and the median scale reliability for the remaining 13 scales and subscales was .78.¹⁵

¹⁴ Two MCMI subtypes were excluded because they were significantly related to errors in prediction in the final regression model. The Self-Defeating subscore increased the rate of false negatives (those predicted to succeed who actually failed) and Anxiety increased the rate of false positives (those predicted to fail who actually succeed).
