

SCHOOL SAFETY

Partnership Opportunity

We are currently seeking partners to receive support from CU Boulder and the Safe Communities Safe Schools (SCSS) initiative, provided free to Colorado schools through a federal grant. SCSS is a data-driven action planning model that helps schools collect information about strengths and gaps related to school safety, culture, and climate to address areas of need using research-informed approaches.

POTENTIAL AREAS WE CAN SUPPORT:

- Addressing concerning behavior
- Developing processes for supporting student mental health
- Integrating inclusion practices for underrepresented students
- Promoting positive staff culture and wellbeing
- Improving strategies related to behavioral threat assessment management
- Enhancing and managing community partnerships

TYPES OF SUPPORT WE PROVIDE:

- Facilitated meetings to implement the SCSS Model
- Trainings on topics related to school culture, climate, and safety
- Technical assistance and consultation from experts in the field

PURPOSE

To strengthen schools' existing efforts in promoting safety and a positive school climate through an individualized, data-based approach.

WHAT WE OFFER

Surveys and data reports to help school or district teams identify strengths and areas of need related to the systems that support school safety, culture, and climate.

WHO WE CAN SUPPORT

Forty school- or district-based multidisciplinary teams in Colorado. Partners will be accepted on a rolling basis.

LENGTH OF PROJECT

Partners can receive up to two years of support, depending on when they enter the project.
