

## **B. Moderate to Moderate High to High Risk Category**

1. Participates and actively engages in recommended level of sex offense specific treatment as evidenced by a measured reduction in dynamic risk.
2. Complete a disclosure of his or her offense related sexual history relevant to identified risk areas as verified through either the sexual history polygraph<sup>1</sup> process, or other clinical indicators<sup>2</sup>.
3. Complete a comprehensive, written plan to manage ongoing risk areas and treatment needs. The plan must be approved by the SOTMP team.
4. Have an approved support person or system who has participated in SOTMP Family Support Education. The support person/system will receive an approved copy of the client's written plan to manage on-going risk areas and treatment needs through their participation in an SOTMP therapist facilitated disclosure session.
5. Demonstrate management of identified risk areas as verified by clinical indicators<sup>3</sup>.
6. Must be compliant with any CDOC psychiatric recommendations for medication which may enhance his or her ability to benefit from sex offense specific treatment.
7. Client does not display attitudes, behaviors or risk factors that present an undue risk to the community. Examples may include, but are not limited to, high degrees of traits associated with psychopathy, sadism and dynamic factors or responsivity needs elevated to an unmanageable level.

---

<sup>1</sup> Polygraph examination results will not be used in isolation to exclude someone from meeting criteria without additional evidence that indicates high risk behaviors.

<sup>2,3</sup> Clinical indicators can be anything that provides information about a client's overall clinical presentation, which may include but is not limited to interviews, quality of treatment participating, polygraph examination results, scores on dynamic risk assessments, psychological evaluation, behavioral observations, and collateral reports.
